The Atmel® XMEGA-C3 Xplained evaluation kit is a hardware platform for evaluating the Atmel ATxmega384C3 microcontroller. The kit offers a range of features that enable the Atmel AVR® XMEGA® user to get started using AVR XMEGA peripherals right away and understand how to integrate the AVR XMEGA device in their own design.

Key Features

- **Atmel ATxmega384C3 microcontroller**
- **OLED display with 128x32 pixels resolution**
- **Transfer data over the USB full/low speed device interface**
- **Read a light sensor with the ADC**
- **Read a temperature sensor with the ADC**
- **Measure external voltage input with ADC**
- **Two Atmel QTouch® buttons**
- **Two user LEDs, one power LED and one status LED**
- **microSD card**
- **Program the kit via USB bootloader or an Atmel programmer**
- **Expand the board with Xplained top modules**

Ordering Information

| Ordering Code | Atmel Store Availability ¹ | Unit Price ² | Buy Online |
|----------------|---------------------------------------|-------------------------|-----------------------------------|
| ATXMEGAC3-XPLD | | | Check Distributor |

¹Backlog orders can be placed for items currently not available.
²Suggested retail price per unit for budgetary use only.
