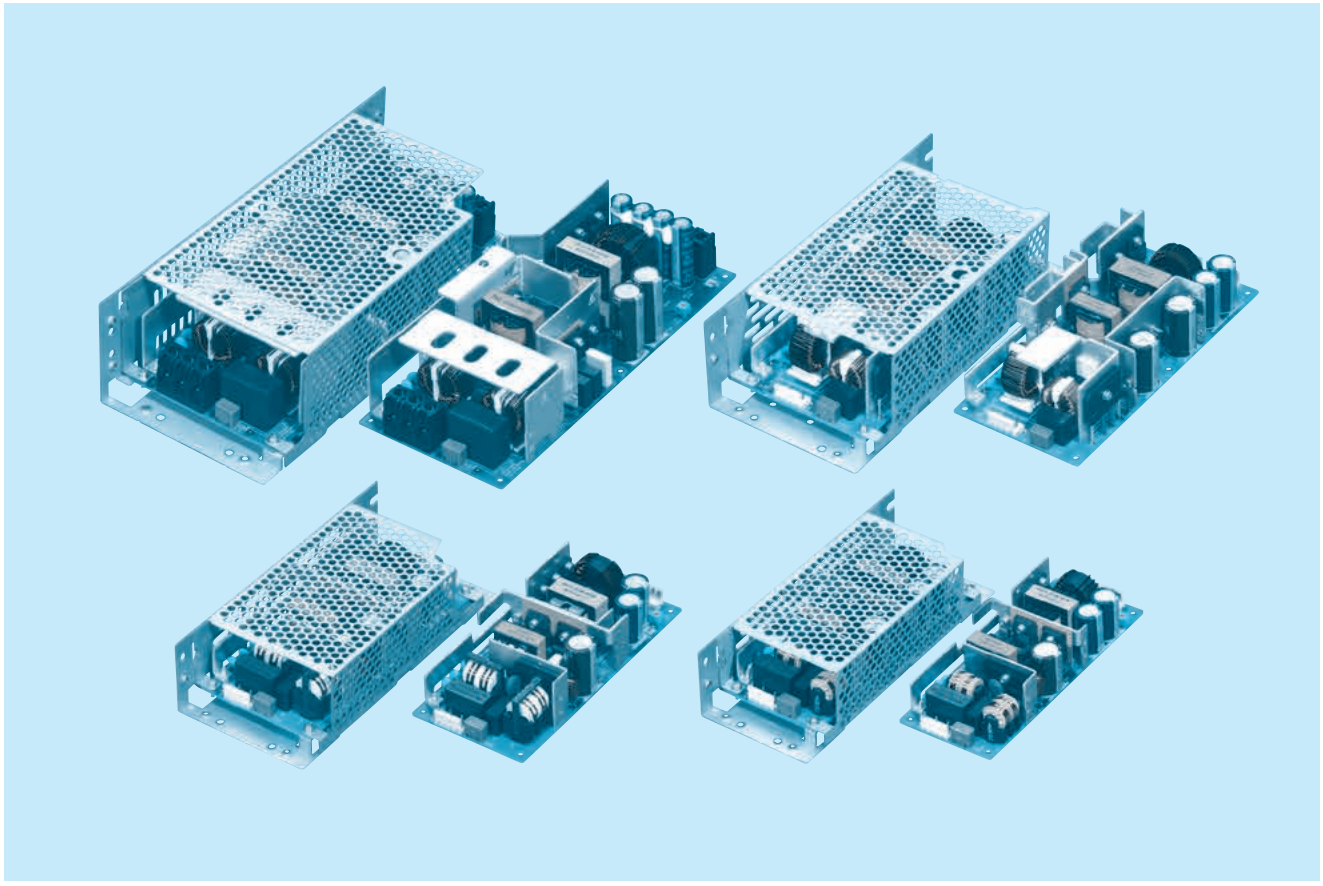
COSEL

Power Factor Correction | World wide | Cost Effective | Rugged PCB type | Safety Approvals | EMI | Inrush current limiting | OCP | OVP

LFP-series



Feature

High power & peak power
Small and compact PCB construction
Built-in inrush current, overcurrent and overvoltage protection circuits
Harmonic attenuator (Complies with IEC61000-3-2 class A)
Universal input (AC85-264V)
Power factor correction

Safety agency approvals

UL60950-1, C-UL(CSA60950-1), EN62368-1
Complies with DEN-AN

EMI

Complies with FCC-B, CISPR22-B, EN55011-B, EN55022-B, VCCI-B

5-year warranty (refer to Instruction Manual)

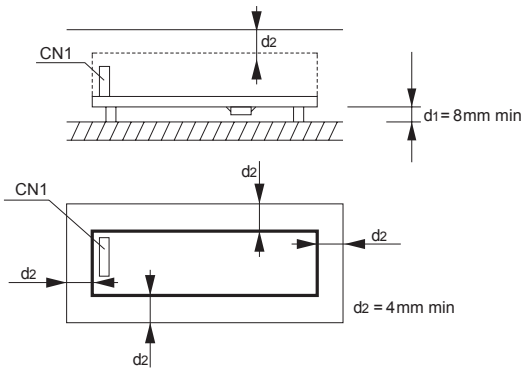
Assembling and Installation Method

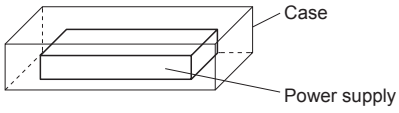
Installation method

■This power supply is manufactured by SMD technology.The stress to P.C.B like twisting or bending causes the defect of the unit,so handle the unit with care.

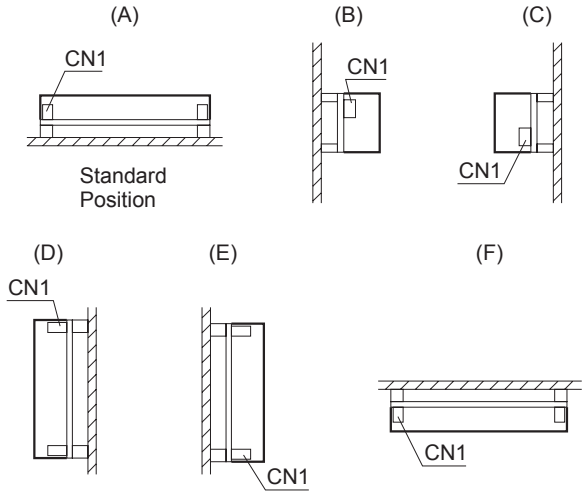
■In case of metal chassis, keep the distance between d1 & d2 for to insulate between lead of component and metal chassis, use the spacer of 8mm or more between d1. If it is less than d1 & d2, insert the insulation sheet between power supply and metal chassis.



■There is a possibility that it is not possible to cool enough when the power supply is used by the sealing up space as showing in right figure. Please use it after confirming the temperature of point A and point B of Instruction Manual 3.



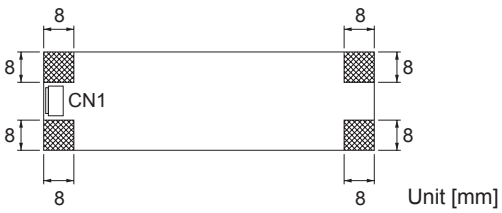
■(F) of LFP300F is not possible. (F) mounting is not possible when unit is with case cover, but if need to operate unit by (F) positioning with case cover, temperature / load derating is necessary.
For more details, please contact our sales or engineering departments.



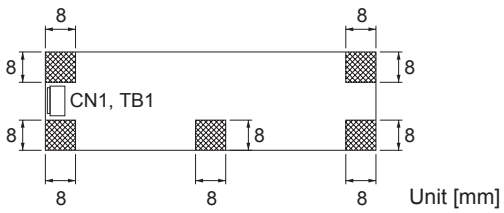
Mounting screw

■The mounting screw should be M3. The hatched area shows the allowance of metal parts for mounting.

● LFP100F, LFP150F



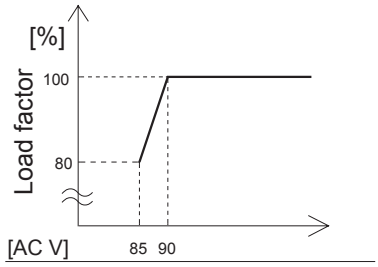
● LFP240F, LFP300F



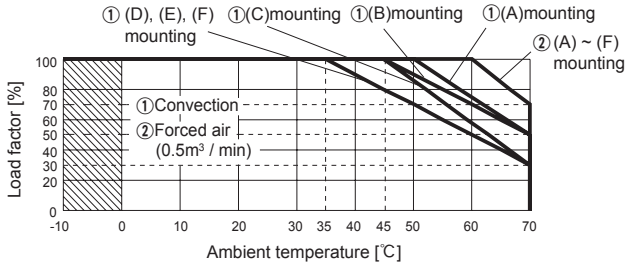
■If metallic fittings are used on the component side of the board,ensure there is no contact with surface mounted components.
■This product uses SMD technology.Please avoid the PCB installation method which includes the twisting stress or the bending stress.
*Recommendation to electrically connect FG to metal chassis for reducing noise.

Derating

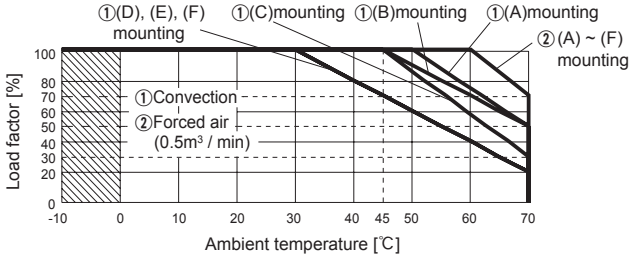
● Derating curve for input voltage



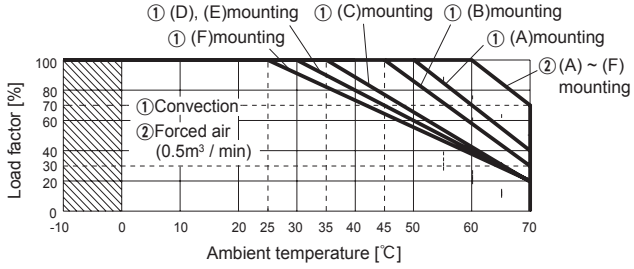
● LFP100F Ambient temperature derating curve (Reference value)



● LFP150F Ambient temperature derating curve (Reference value)

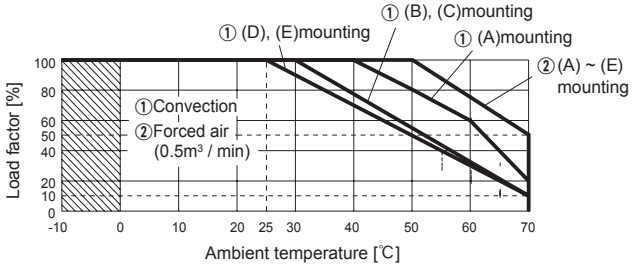


● LFP240F Ambient temperature derating curve (Reference value)



Output voltage	Output power[W]	
	①Convection	②Forced air
24V	240.0	300.0
30V	240.0	300.0
36V	241.2	302.4
48V	240.0	302.4

● LFP300F Ambient temperature derating curve (Reference value)



Output voltage	Output power[W]	
	①Convection	②Forced air
24V	300.0	360.0
30V	300.0	360.0
36V	302.4	360.0
48V	302.4	360.0

■The operative ambient temperature is different by with ⁄ without chassis cover or mounting position.
Note: In the hatched area, the specification of Ripple, Ripple Noise is different from other area.

■Make sure the temperature at point A and point B is less than the temperatures shown in Instruction Manual 3.

■The ambient temperature should be measured 5 to 10 cm away from the power supply so that it won't be influenced by the heat from the power supply. Please consult us for more details.
