

SUBMINIATURE COAXIAL CONNECTORS

QMA series

Member of the Quick Lock Family

ISO 9001 APPROVED

Head Office - Rosny sous Bois

Since 1952, **RADIALL** has specialized in the field of coaxial connectors and cables assemblies. **RADIALL's** experience and high technology focus, combined with our large worldwide production capability have made the company a major supplier of RF coaxial connectors in the world and the number one in Europe.

RESEARCH & DEVELOPMENT

The ever increasing sophistication of microwave communication systems is continually requiring components to meet a higher level of performance. **RADIALL's** research and development groups understand these needs and are committed to searching for product solutions that will be needed in the future. They also are providing continued improvements to our already extensive lines of high performance products. All our engineer teams are equipped with state of the art equipment and facilities, in an effort to provide the best solutions to our customers.

CAD workstation

Screw-machining shop

MANUFACTURING

RADIALL knows that the quality of the connectors components is directly related to the mechanical precision of the machining process, along with good quality procedures. In an effort to continually meet the highest quality standards, all our production plants are equipped with the latest state of the art production equipment. **RADIALL's** manufacturing process maintains strict control of all procedures and incorporates all tooling, machining, surface treatment and assembly operations into the manufacturing process of each production group.

Base station of cellular network

QUALITY ASSURANCE

RADIALL, as a TQM company, continually searches for improvements to the quality process. We operate a Quality Assurance Program that has been developed in accordance with the national and **CECC** agencies (equivalent to **MIL-I-45208** and **MIL-C-45662** standards). This program has enabled us to achieve QPL approval on several of our connector series. **RADIALL's** Quality Assurance Program operates at all levels of manufacturing from the initial raw incoming material to the final testing procedures just prior to shipping. All test equipment is part of the quality process and is continually inspected on a regular scheduled basis. All production plants in Europe are **AQA P4-NATO** certified.

HIGH RELIABILITY

Reliability of inter-connection systems is of the utmost importance in telecommunications applications. This industry need has led **RADIALL** to link high performance design, manufacturing and quality control. This has given the company the capability to produce connectors that will operate in the most stringent environments. The wide range of our product offering allows us to propose the best complete solution for your exact need.

Microwave test device

ISO 9001 ACCREDITATION

This certificate is witness to **RADIALL's** achievement and commitment to the Total Quality Process. **RADIALL** has always been, since its inception, a company committed to being a Total Quality supplier. Quality is our way of life at **RADIALL**.

Cost Effective solution

The **QMA** series, member of the Quick Lock family, is the new patented innovative **snap-on** generation of brass SMA connectors. With the same interface dimensions, **QMA** connectors have the same high electrical performances as the SMA series with an easier and faster mounting design. **QMA** series offers a cost effective solution for new generations of base stations.

The **QMA** series is designed for DC to 6 GHz. Engagement life is 100 matings, just as standard commercial SMA connectors, with total reliability. They are easy and fast to connect and disconnect.

The new **QMA** series offers a large range of connectors: straight and right angle plugs, bulkhead jacks, flange receptacles, PCB receptacles, adapters ... Models are either full crimp, crimp or solder type for flexible, semi-rigid or conformable cables.

Saving mounting time: 10 times faster!

With its snap-on mating system, **QMA** connectors are 10 times quicker to mount than a screw-on SMA. It takes less than 2 seconds to connect **QMA** connectors in field conditions.

Risk in damaging or scratching the panel is limited as no torque wrench is required.

Screw-on connectors: SMA

Snap-on connectors and member of the Quick Lock family: QMA

Secure connection: Click !

Snap-on connection is insured by a chamfer. Moreover, a positive locking system insures a good and secure connection. The disengagement force is lower than the panel tear-off force, preventing from any panel damaging.

QMA connectors have been successfully tested against vibration.

Space-saving

QMA connectors have a lower space requirement since space for the use of a torque wrench is not necessary. The distance between connectors is therefore optimized on the panel.

For very compact assembly in which there is not enough space to disconnect by hand, a very easy to use extraction tool (p.17) is available to disconnect either straight or right angle **QMA** connectors.

Flexibility: 360° rotation

The cabled plug can freely rotate around the jack, which allows more flexibility during the mounting process and eases installation in the equipment. Moreover, it prevents from any added stress on the cable and any return loss reduction due to cable bending.

QMA implementation

You can at anytime switch from **SMA** to **QMA** connectors since panel or PCB cut out and crimping tool required are the same.

Packaging

Standard packaging is 100 pieces. Unit packaging is available upon request. SMT receptacles are delivered in tape and reel of 100, 250 or 300 pieces.

Measure adapters

In order to ease the implementation of **QMA** connectors in new systems, Radiall has developed a full range of **QMA/SMA 3.5** adapters (p.14).

QMA

QMA Calibration process

To calibrate your module equipped with QMA connectors and measure VSWR, Radiall recommends to use the following process :

1 - Calibration with SMA 3.5 to SMA 3.5 calibration adapters and a SMA calibration kit.

2 - Exchange of the calibration adapter with the required QMA adapters

SMA 3.5/SMA 3.5 adapters and QMA/SMA 3.5 adapters have the same electrical length and the same return loss and this allows an accurate measure.

Joule effect soldering device

Compliant with European standard n° 89/336/CEE and 73/23/CEE (electromagnetic compatibility and low voltage)

It allows to solder :

- center contacts and bodies to semi-rigid cables,
- center contacts to flexible cables,
- solder pot receptacles.

P/N of the soldering device: **R282 800 000**.

Please, ask for our leaflet about Joule effect soldering device **D1 035 DE**.

Radiall recommends to always carry out soldering operations in well ventilated areas and to make use of fume extraction equipment.

Our fume extraction device complies also with European standards n° 89/336/CEE, 89/392/CEE and 73/23/CEE. Its flow is adjustable up to 240 m³/h and it uses active coal filter.

P/N of the fume extraction device: **R282 803 000**.

R123 153 000 R123 153 003 R123 154 000 R123 154 003	3.17	R282 053 000	R282 067 000	R282 740 000	R282 744 220

1

Insert the cable into the clamping element.
Present the pointer in front of the clamping element.
Push the cable until it stops, while holding the clamping element pushed on the hollow part of the pointer.
Turn the clamping part until the release of the pointer.

2

Present the cutting element in front of the cutting element.
Push and turn both elements, back part opposite to the front part.
Once they reach the stop, pull without revolving.

3

Insert the cable into the body.
Secure the positioner into the assembly jig.
Place the sub-assembly into the assembly jig.
Tighten.

4

Put three rings of solder around the cable.
Solder the body onto the cable.

5

After cooling, remove the assembly from the jig.
Remove the positioner.
Solder the inner conductor.

6

Place the cap into the body.
Press on the cap flush or slightly below the surface of the body assembly.

COPLANAR LINE: Pattern and signal are on the same side. Thickness of PCB = 1.6 mm.
 The material of PCB is the glass epoxy resin ($E_r = 4.8$). The solder paste should be printed except for the land pattern on the PCB.

Vacuum nozzle dimensions:

M04

A - SOLDERING PROCEDURE USING AUTOMATIC PICK AND PLACE EQUIPMENT:

1) Solder paste:

- RADIALL recommends using a **solder paste Sn63-Pb35-Ag2 type** (63% tin - 35% lead - 2% silver) “**no clean - low residue**” (5% solid residue of flux quantity) that will permit the **elimination of the cleaning operation step** after soldering.
- When using a conventional solder paste with high level (50%) of flux solid residue, it is important to incorporate a good cleaning operation step, similar to what is described below in paragraph 5.
- Note: when choosing a solder paste for gold-plated PCB pattern, it is important to use a paste made with silver. This will help to avoid formation of intermetallics as part of the solder joint.

2) Solder paste deposition:

- The solder paste should be deposited on the designated zone areas (see patterns p28) by a screen printing process. RADIALL advises a thickness of .008” (0.2 mm).
- If using a thickness of less than .008” (0.2 mm) the zone area must be specifically designed for this thickness (please consult RADIALL).
- Please optically verify that the edges of the zone are clean and without contaminates.

3) Placement of the component:

- Place the receptacle onto the PCB with automatic pick and place equipment. Please verify that the PCB zoned areas have not oxidised.
- Various types of suction can be used (see vacuum nozzle dimensions, p28).
- RADIALL does not recommend using adhesive agents on the receptacle or on the PCB.
- The use of a video camera is preferred for checking the positioning of the components (see video shadow, p28).

4) Soldering: infra-red reflow process:

- Please follow RADIALL’s recommended profile as illustrated.
- When using a “no clean - low residue” type of solder paste, RADIALL recommends a linear pre-heat profile not to exceed 160°C with a 1 to 2°C/s. rise.

5) Cleaning of the PCB:

- When using a conventional solder paste with high level of residue, please clean the PCB with a substitute product, similar to CFC, that complies with International Environmental Agency rules.
- RADIALL recommends using a vapor phase process (ultrasonic waves are acceptable).

6) Quality check:

- Verify by visual inspection that center contact of the receptacle has not been contaminated by solder or flux.
- Solder joints: verify by visual inspection that the formation of meniscus on the sides of the receptacle legs are proper.

B - SOLDERING PROCEDURE BY MANUAL OPERATION:

1) Solder paste: (Refer to procedure A - 1)

2) Flux deposition:

- Deposit a thin layer of flux on mounting zone.
- Allow the flux to evaporate a few seconds before applying the solder paste (in order to avoid dilution of the paste).

3) Solder paste deposition:

- Deposit a small quantity of solder paste on mounting zone area by syringe.
- Be careful, do not apply solder paste outside of the zone area.

4) Placement of the component:

- Lift the body of the receptacle with tweezers. Do not use your fingers (fingers risk twisting the legs of the receptacle or ejecting the center contact and can contaminate contact surfaces).
- Place the component on the mounting zone by pressing lightly on the top of the receptacle with tweezers. The receptacle legs will stick into the solder paste.

5) Soldering:

- Pre-heat stage: use a heat gun (soldering iron is not recommended) at a distance of .800” (20 mm) from the receptacle, applying the jet of air in a continuous circular motion, until the solder paste starts to look dull. this stage avoids any thermal shock since both areas to be soldered are brought up to the same temperature.
- Final re-melting step is carried out by moving the heat gun to a closer distance of .200” (5 mm) from the receptacle while guiding the jet of air onto each receptacle leg, at a 45° angle.

6) Cleaning of the PCB: (Refer to procedure A - 5)

7) Quality check: (Refer to procedure A - 6)

M 05

STRIPPING DIMENSIONS

We recommend a thermal preconditioning cable

part number	stripping dim. a	stripping tool	pointer	assembly jig	positioner	control gauge
R123 054 000	3.17	R282 051 000	R282 063 000	R282 740 000	R282 744 220	R282 862 090
R123 055 000		R282 053 000	R282 067 000			R282 862 070

1

Insert the cable into the clamping element.
 Present the pointer in front of the clamping element.
 Push the cable until it stops, while holding the clamping element pushed on the hollow part of the pointer.
 Turn the clamping part until the release of the pointer.

3

Mount the positioner A.
 Slide the centre contact into the positioner A.
 Insert the solder gauge between the centre contact and the cable.
 Tighten
 Solder the contact

2

Present the cutting element in front of the cutting element.
 Push and turn both elements, back part opposite to the front part.
 Once they reach the stop, pull without revolving.

4

After cooling, remove the assembly from the jig.
 Positioning the connector onto the Assembly jig.
 Slide the cable into the connector until it bottoms against the insulator
 Tighten.
 Put three rings of solder around the cable and solder.
 After cooling, remove the assembly from the jig.

TAPE AND REEL

ACCORDING TO IEC 286-3 STANDARD

MATERIALS

Reel: polyester

Carrier tape: antistatic PETG (polyester)

Cover tape: polyester

PRECAUTION FOR USE

Automated pick and place machines use standard tooling to peel the antistatic film off.

There is thus a risk for the two legs being deformed while they pass through the tool during the suction operation.

The user must then widen the "a" dimension of the peeling tool.

R282 211 000	crimp tool (dies included)	20
R282 223 000	crimp tool (dies included)	20
R282 235 003	dies	21
R282 235 011	dies	21
R282 235 037	dies	21
R282 271 000	crimp tool (dies included)	20
R282 281 000	crimp tool for center contact	21
R282 293 000	MIL crimp tool (dies not included)	21
R282 344 127	1.27 across flats male hex key	23
R282 344 150	1.5 across flats male hex key	23
R282 744 240	positioner for right angle plugs for semi rigid cables	24
R282 750 000	bending tool	22
R282 751 050	bending gauge .085"	22
R282 751 051	bending gauge .085"	22
R282 751 070	bending gauge .141"	22
R282 751 071	bending gauge .085"	22
R282 751 080	bending gauge .250"	22
R282 800 000	joule effect soldering device	19
R282 803 000	fume extraction device	19
R282 864 110	blade installation gauge .085"	23
R282 864 120	blade installation gauge .141"	23
R282 868 230	extraction tool	20
R282 967 015	positioner for center contact crimp tool	21
R282 967 016	positioner for center contact crimp tool	21
R284 V01 01 003	QMA pigtail	13
R404 114 000	male type low power termination	15
R572 E12 000	QMA SPDT switches failsafe 12 V	16
R572 E13 000	QMA SPDT switches failsafe 28 V	16
R572 E32 000	QMA SPDT switches latching 12 V	16
R572 E33 000	QMA SPDT switches latching 28 V	16
R577 E12 000	QMA DPDT switches failsafe 12 V	17
R577 E13 000	QMA DPDT switches failsafe 28 V	17
R577 E32 000	QMA DPDT switches latching 12 V	17
R577 E33 000	QMA DPDT switches latching 28 V	17
R577 E02 600	QMA SPnT switches normally open 12 V	18
R577 E03 600	QMA SPnT switches normally open 28 V	18
R577 E22 600	QMA SPnT switches latching 12 V	18
R577 E23 600	QMA SPnT switches latching 28 V	18

INNOVATIVE TECHNOLOGIES : surface-mount / press-fit / low intermodulation / quick lock / pressure contact

► **ULTRAMINIATURE**

IMP : 50 , SMT series, press-on electrical contact

UMP : 50 , SMT series, press-on electrical contact

► **MICROMINIATURE**

SBMO : 50 , snap-on blind mate series (DC-40GHz)

MMS/MC card/MMT : 50 , snap-on, SMT series

RF switch

COAXIPACK : metric system 2mm & DIN 41626

SSMA : 50 , screw-on

SSMB : 50 , snap-on

SBMA : 50 , blind mate

Custom models can be developed according to your specifications

Custom packaging can be adapted to the exact customer needs

► **STANDARD**

QN : 50 , snap-on, Quick Lock Family

DT-F : 75 , screw-on

BNC : 50 & 75 , bayonet system, standard & commercial

TNC/TNC 18 : 50 & 75 , screw-on, standard & commercial

DIN 1.6/5.6 : 75 , screw-on, snap-on & slide-on

N/N 18 : 50 & 75 , screw-on, standard & commercial, low intermodulation models, slide-on models

DIN 7/16 : 50 , screw-on, low intermodulation

Other series : HN - UHF - C - LC

► **SPECIAL & HIGH VOLTAGE**

miniQUICK : 50 & 75 , push-pull system, slide-on models

BNC TRX / N TRX : triax series

BNC HT/SHV : bayonet system, 10 KV-10 A

miniQUICK HT : push-pull system, 12 KV-10 A

► **MINIATURE**

MCX : 50 & 75 , snap-on

SMA : 50 , screw-on, slide-on, standard & commercial

QMA : 50 , snap-on, quick lock family

SMA 2.9 : 50 , screw-on (DC-40GHz)

SMB, SMB LOCK, SMB CARLOCK : 50 , snap-on

SMC : 50 , screw-on

SMZ : 75 , snap-on, lock-on, type BT43 series

BMA : 50 , blind mate, standard & commercial

DIN 1.0/2.3 : 50 & 75 , screw-on, snap-on & slide-on, lock-on models

FME : easy-connect cabling system

► **BETWEEN-SERIES ADAPTORS**

More than 95 combinations of different interfaces 50 & 75 , push-on type

► **COAXIAL CABLE & CABLE ASSEMBLIES**

RG cable ass. : standard & special cables DC-18GHz

Option to RG cable ass. : halogen free, flame retardant

SHF cable ass. : ultra low loss flexible cables DC-40GHz

Corrugated cable assemblies : (IMP : -125 dBm)

Semi-rigid and conformable cables : DC-46GHz

Custom design products (harness)

► **ANTENNAS**

Omnidirectional wire patch antenna

Patch array antenna (new dielectric material)

Patch ceramic or metallic antenna

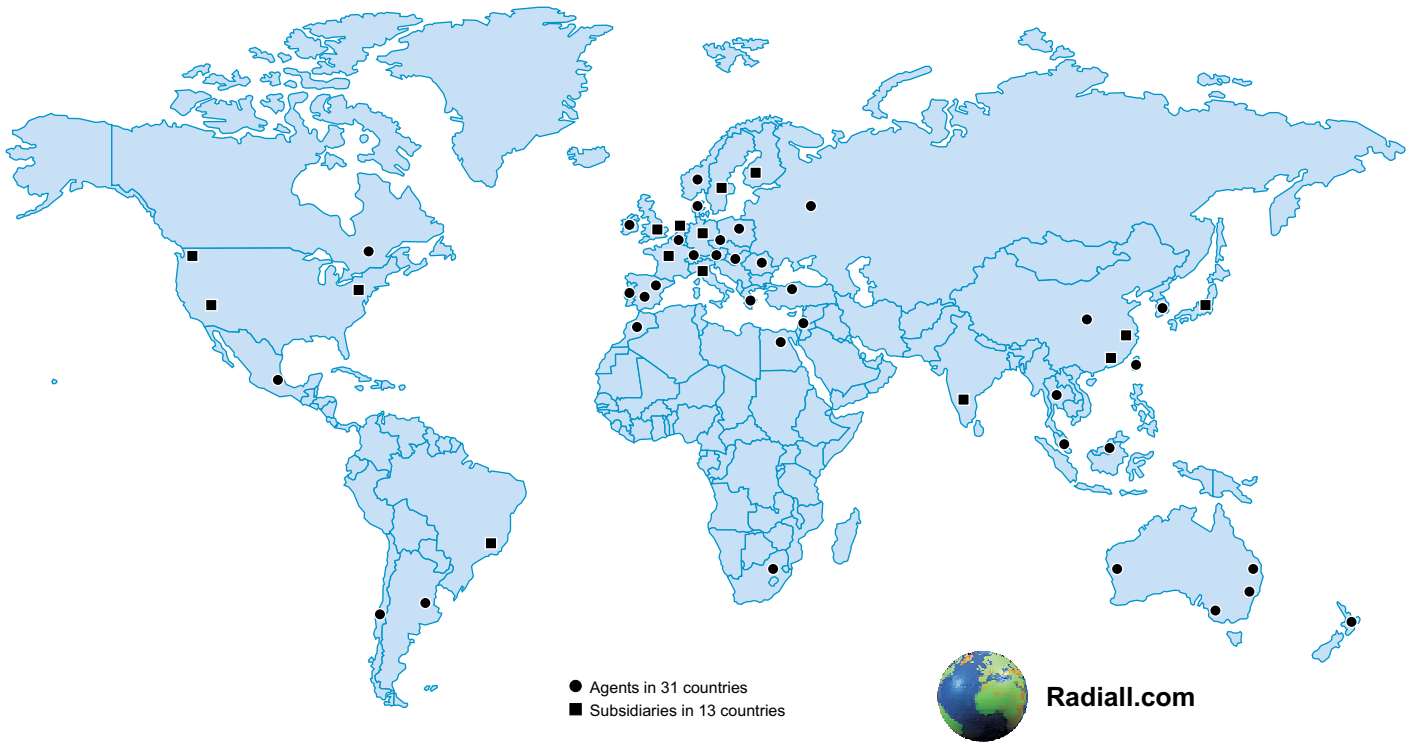

Printed or wire dipole antenna

Dual polarization antenna

Dual band antenna

Embedded or external antenna

► **ACCESSORIES & ASSEMBLY TOOLING**

Radiall.com

RADIALL WORLDWIDE LOCATIONS

EUROPE

France - RADIALL HEADQUARTERS
 101, Rue Ph. Hoffmann - 93116 ROSNY sous BOIS (Paris)
 Tel. : +33 1 49 35 35 35 Fax : +33 1 48 54 63 63
 E-Mail : info@radiall.com

Finland - RADIALL S.F.
 Pakilantie 61 - FIN-00660 HELSINKI
 Tel. : +358 934 89 356 Fax : +358 934 89 358
 E-Mail : info@radiall.fi

Germany - RADIALL G.m.b.H.
 CarlZeiss Str. 10 Postfach 200143 - D63307 RÖDERMARK (Frankfurt)
 Tel. : +49 60 74 91 07 0 Fax : +49 60 74 91 07 70
 E-Mail : info@radiall.de
 Regional offices : Munich

Italy - RADIALL Elettronica S.R.L.
 Via Concordia, 5 - I20090 ASSAGO MILANO
 Tel. : +39 02 48 85 121 Fax : +39 02 48 84 30 18
 E-Mail : radiall@tin.it
 Regional office : Roma

Netherlands - RADIALL B.V.
 Postbus 64 - 3870 CB HOEVELAKEN
 Tel. : +31 33 253 40 09 Fax : +31 33 253 45 12
 E-Mail : info@radiall.nl

Sweden - RADIALL A.B.
 Sjöängsvägen 2 - SE-192 72 SOLLENTUNA (Stockholm)
 Tel. : +46 844 434 10 Fax : +46 875 449 16
