

Date Code and Lot Code – explanation

All lithium batteries produced by Vitzrocell are marked with date & lot code by rule of internal management.

- The lot code contains a time of assembly after electrolyte filling.
- The date code shows the time of final outgoing inspection.

The lot code is marked with the information including A(AM) / B(PM), date, month and year in alphabet & figures.

The date code indicates the month and year in figures.

[Example of marking]

Date code(2009): November of 2020
