TECHNICAL DETAILS

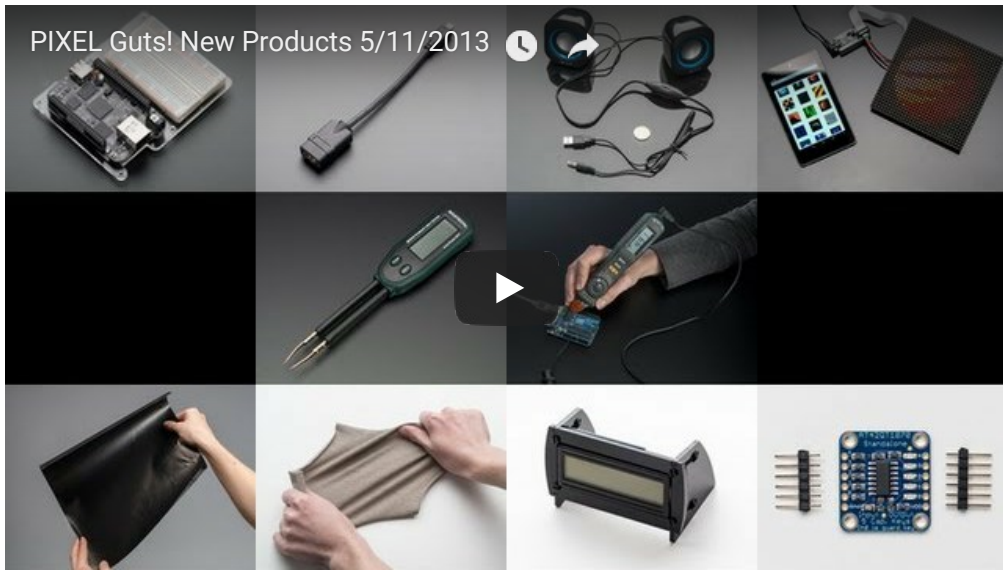

DESCRIPTION

Here is a mini-kit to get your 16x2 LCD standing up straight on your table. Made of 3mm black acrylic pieces, with 4 x 1" nylon screws & 4 x nylon hex nuts, it goes together in a jiffy and looks super-spiffy!

This product is designed specifically for our [16x2 USB/Serial backpacks](#). Our OLED 16x2 displays and RGB backlight [positive](#) and [negative](#) LCDs have slightly smaller screw holes so you'll have to drill them out to fit the #4-40 screws if you want to use them together.

Character LCD not included! but [we have lots in the shop to choose from!](#)

We have a lovely tutorial on assembling the stand and setting up an LCD system monitor for [Windows](#), [Mac](#) or [Linux/Raspberry Pi](#) computers
