

## Mounting strap

### For mounting of VEGA instruments

The mounting strap of 316L offers the advantage of a simple mounting and the specific orientation of radar and ultrasonic sensors. The required mounting material is attached.

#### Mounting accessory

<b>XA</b>	Mounting strap 170 mm, PULS61/67 .....
<b>XB</b>	Mounting strap 300 mm, PULS61/67 .....
<b>XC</b>	Mounting strap 170 mm, w.bracket for G1½ .....
<b>XD</b>	Mounting strap 300 mm, w.bracket for G1½ .....
<b>XE</b>	Mounting strap 195 mm, SON63 (Mat.304) .....

## Mounting bracket with 45° reflector

### For mounting of radar sensors VEGAPULS 61 and VEGAPULS WL 61

Reflector for lateral deflection of the radar signals via a surface which is declined by 45° with integrated fastening and complete mounting set. Particularly suitable for mounting in overflow basins and closed channels. Through the deflection of the signals via the reflector, a very low height is reached ensuring an optimum use of the complete filling height.
