ANSMANN HS5R

This Professional Spotlight is made from robust ABS plastic and is therefore light comfortable to hold. It has the latest LED technology for significantly higher light output. The LED is a 5W from well known CREE.

With its integrated Lithium Ion rechargeable battery (3.7V / 2600mAh) this fantastic lantern also incorporates "mains failure electronics" whereby if the mains fails the lamp automatically lights offering emergency lighting just when you need it.

There are three light functions: **100%**, **25%** and **flashing** which will give battery life of **2 hrs**, **9.5 hrs** and **16 hrs** respectively.

This spotlight also has an excellent beam reaching up to **500m at 100% (with 420 lumens)** power and up to **255m at 25% (with 105 lumens)** power. The lamp head can be angled up to 90 degrees to give additional lighting convenience.

There is a very powerful magnet on the base to mount to any metallic object and helps to hold it into its charging cradle. The charging cradle can be wall mounted and includes **wall plugs and screws**.

Also included with the spotlight is an orange coloured filter for use as a warning light.

INFORMATION

Product name	HS5R	Product	215,5 × 81,5 × 105 mm / 801g
Part No.	1600-0222	Packing + Product	136 × 100 × 250 mm / 963g
EAN-Code	4013674139828	Packing Unit	6 (428 × 220 × 280 mm)
Customs tariff number	85131000000		
Material Group	02
