## Xinger

## Ultra Low Profile 0805 $3 \mathrm{~dB}, 90^{\circ}$ Hybrid Coupler

## Description

The C0727J5003AHF is a low cost, low profile sub-miniature high performance 3 dB coupler in an easy to use surface mount package. The C0727J5003AHF is ideal for balanced power and low noise amplifiers, plus signal distribution and other applications where low insertion loss and tight amplitude and phase balance are required. The C0727J5003AHF is available on tape and reel for pick and place high volume manufacturing.

All of the Xinger components are constructed from ceramic filled PTFE composites which possess excellent electrical and mechanical stability. All parts have been subjected to rigorous qualification testing and units are 100\% RF tested.

Detailed Electrical Specifications: Specifications subject to change without notice.

| Features: | Parameter | ROOM ( $25^{\circ} \mathrm{C}$ ) |  |  | Unit |
| :---: | :---: | :---: | :---: | :---: | :---: |
|  |  | Min. | Typ. | Max |  |
| - $700-2700 \mathrm{MHz}$ | Frequency | 700 |  | 2700 | MHz |
| - High Isolation \& Low Loss | Port Impedance |  | 50 |  | $\Omega$ |
| - LTE Bands: 24 | Return Loss | 23 | 31 |  | dB |
| - Surface Mountable | Isolation | 23 | 28.8 |  | dB |
| - Tape \& Reel | Insertion Loss* |  | 0.7 | 0.8 | dB |
| - Non-conductive Surface | Amplitude Balance |  | 2.3 | 2.8 | dB |
| - Halogen-Free | Phase Balance (relative to $90^{\circ}$ ) |  | 6.5 | 11 | Degrees |
| - 100\% RF Tested | Power Handling @ $8^{\circ} \mathrm{C}$ |  |  | 2 | Watts |
| - $-55^{\circ} \mathrm{C}$ to $140^{\circ} \mathrm{C}$ | Operating Temperature | -55 |  | +140 | ${ }^{\circ} \mathrm{C}$ |

* Insertion Loss stated at room temperature (Insertion Loss is approximately 0.1 dB higher at $+85^{\circ} \mathrm{C}$ )

## Definition of Measured Specifications

| Parameter | Definition | Mathematical Representation <br> $i, j, k, m$ is denoted as the port index of input, isolated, direct <br> and coupled port for specific pin configuration shown in the table |
| :---: | :--- | :--- |
| Return Loss | The impedance match of the <br> coupler to a 50, system. Return <br> Loss is an alternate means to <br> express VSWR. | $\left.20 \log _{10}\| \| S_{i i} \mid\right)$ |
| Isolation | The input power divided by the <br> sum of the power at the two <br> output ports. | $20 \log _{10}\left\|S_{j i}\right\|$ |
| Insertion Loss | The input power divided by the <br> sum of the power at the two <br> output ports. | $10 \log _{10}\left(\left\|S_{m i}\right\|^{2}+\left\|S_{k i}\right\|^{2}\right)$ |
| Amplitude | The difference in power between <br> the two outputs. | $10 \log _{10}\left(\left\|\frac{S_{k i}}{S_{m i}}\right\|\right)$ |
| Balance |  |  |

$* 100 \%$ RF test is performed per spec definition for pin configuration 1 and port 1 (input port) is connected to pin1, port 2 (isolated port) is connected to pin 3, port 3 (direct port) is connected to pin 4 and port 4 (isolated) is connected to pin 6.

## Packaging and Ordering Information

Parts are available in reel and are packaged per EIA 481-D. Parts are oriented in tape and reel as shown below. Minimum order quantities are 4000 per reel.
