Part Number: SEN0038

Description: Gravity: TT Motor Encoders Kit

INTRODUCTION

This encoders kit are designed for TT motors. It provides the rotation degree of the wheels. Encoder uses non-contact method to convert the angular displacement signals. Best fit with Micro DC Geared Motor. It includes encoders, plastic tube, paper-mediated gasket etc.
It uses Gravity interace which is a plug & play design to get connected with Arduino IO Expansion Shield or Raspberry IO Expansion Shield.

SPECIFICATION

- Voltage:+5V
- Current:<20mA
- Resolution:20 PPR
- Weight:20g

SHIPPING LIST

- M3*5 screws   x2
- M3*50 screws   x4
- Rubber ring   x4

- Washer   x4
- Plastic cover   x4
- Grating disk   x2
- Digital cable   x2
