

## A Tallysman *Accutenna*® TW8825 GPS L1/L5 + GLONASS G1 + BeiDou B1 + Galileo E1/E5a

The TW8825 employs Tallysman's unique *Accutenna* technology providing dual band GPS L1/L5, GLONASS G1, Galileo E1/E5a, and BeiDou B1 coverage and is especially designed for precision dual frequency positioning where light weight is important.

The TW8825 features a precision tuned, circular dual feed, stacked patch element. The signals from the two orthogonal feeds are combined in a hybrid combiner, amplified in a wide-band LNA, then band-split for narrow filtering in each band and further amplified prior to recombination at the output.

The TW8825 offers excellent axial ratio and a tightly grouped phase center variation.

The TW8825 covers GPS L5 + Galileo E5a (1176.45MHz centre), GPS L1/WAAS/EGNOS/MSAS (1575.42MHz), GLONASS G1 (1602MHz, centre), Galileo (1575.42MHz centre), and BeiDou B1 (1575.42MHz centre)

The TW8825 has a pre-filter which increases the antenna's immunity to high amplitude interfering signals, such as LTE and other cellular signals.
