SAMD21 ML Evaluation Kit with TDK InvenSense 6-axis MEMS
☆

Part Number: EV18H79A

Summary:

The SAMD21 Machine Learning evaluation kit features the SAMD21G18 Arm® Cortex®-M0+ based 32-bit microcontroller (MCU) with on-board debugger (nEDBG), an ATECC608A CryptoAuthentication™ secure element IC and the fully certified

Product Features

SAMD21G18 Arm® Cortex®-M0+ based 32-bit microcontroller (MCU) with on-board debugger (nEDBG)

ATECC608A CryptoAuthentication™ secure element IC

Fully certified ATWINC1510 Wi-Fi® network controller

MCP9808 high accuracy temperature sensor

TDK InvenSense ICM-42688-P, High precision 6-axis MEMS
