*To Most People It's Just a  
Rubber Connector Cover*

*At Glenair It's a  
Good Ol' "Marshal Bean"*

**W**e're always hard at work at Glenair developing new and improved interconnect products and accessories. Our "Marshal Bean" Protective Rubber Covers are a fine example—even if they have been around for a month of Sunday's.

"Marshal Beans" provide robust physical and environmental protection while eliminating the damage caused when metal connector covers bang against equipment housings, or when test cables get dragged across the shop floor! The covers come in two material

types: a flexible neoprene rubber or a proprietary conductive material which dissipates static electricity.

Glenair Bean Rubber Covers have been available for years, but this catalog introduces four new universal models that make order-entry a snap for standard MIL-C-24308 D-Subminiature's, MIL-DTL-83513 Micro-D's, ARINC 400's and all uniformly rectangular connectors. At Glenair, we reckon a flexible rubber cover is the perfect way to protect an interconnect cable. So isn't it time you hired "Marshal Bean" to ride herd on your connector investment?

## Product Selection Guide: Rectangular Connector Accessories

### Rectangular Backshell Selection Guide

Rectangular connector accessories offer users of rack and panel connectors the same range of connector and cable protection available for standard circular interconnects—strain relief, EMI shielding, environmental protection and so on. Glenair's Rectangular Connector Backshells and Accessories catalog presents hundreds of our most popular designs, organized by connector product family and connector manufacturer.

**D-Subminiature MIL-C-24308:** Glenair's Series 55 line of connector accessories for MIL-C-24308 connectors feature total enclosure of the mated plug and receptacle connectors for optimum EMI Shielding.

A variety of cable/harness shield terminations are offered for overall shields and/or individual shielded complexes. Optional conductive EMI gaskets are available for installation under the receptacle connector flange. Three cable entry locations are offered. A straight "top" cable entry and two 90° "end" and "side" entries. Split backshell designs provide easy assembly and convenient access for maintenance.

**MIL-C-81659:** Glenair manufactures a full-spectrum line of rectangular backshells for MIL-C-81659 connectors. Built from light-weight aluminum alloy and available in a wide range of finishes, our MIL-C-81659 backshells provide robust EMI and environmental protection.

Solid and split-shell designs are available for cable strain-relief and EMI shield termination. Top and side cable entry configurations provide flexibility in contact termination.

**Micro-D MIL-DTL-83513:** Glenair's extensive Micro-D backshell offering includes EMI banding shells, switching shells, potting shells and protective covers.

EMI bands and installation tools are sold separately. Most designs are available in up to six standard finishes. Backshells are available for all standard M83513 metal shell connectors.

**MIL-C-83527:** The Glenair 527-002 series backshell is designed for use with MIL-C-83527/1 connectors. Eight

cable entry points are available on the backshell's side, ends and top (a maximum of three entry combinations may be selected). Made from rugged aluminum alloy, the backshell is available in a full range of standard finishes. Consult factory for custom finish options. Backshell hardware is passivated stainless steel. Each unit ships with an RFI gasket.

**MIL-C-83733:** Glenair's split backshells for MIL-C-83733 connectors are available in three designs which offer either a standard cable clamp, saddle-bar style strain-relief, or an EMI shield banding platform. Tongue and groove joints provide optimal EMC. Customers may choose from up to six cable entry locations. Backshell bodies are made from aluminum alloy with passivated stainless steel hardware. A full range of standard finishes are available, including custom options.

**ARINC Series 400 and 600:** Glenair has a full line of RFI/EMI backshells for ARINC Series 400 and 600 connectors. Backshells in the ARINC 400 Series include

Cannon DPKA, DPXB, DPJM, DPXA and DPX3. In the 600 Series we stock backshells for the complete range of Size 1, 2 and 3 ARINC 600 connectors. Every functional requirement—from overall and individual shield termination to basic saddle-bar style strain relief is available. The light-weight aluminum alloy backshells are supplied in all common finishes and cable entry configurations.

**Hypertronics:** Glenair backshells and protective covers for Hypertronics connectors protect critical terminations from mechanical damage. A full range

of plating options are available as are custom finishes in both top and 45° cable entries.

## Standard Materials and Finishes

The following are Glenair's standard finishes. Individual product pages within this catalog list their most common finishes. Additional finishes are listed within the table below.

**TABLE II - STANDARD FINISHES**

GLENAIR M85049 SYMBOL		FINISH	SPECIFICATION(S)
SYMBOL	REFERENCE ONLY		
B		Cadmium Plate, Olive Drab	AMS-QQ-P-416, Type II, Class 3
C*	A	Anodize, Black	AMS-A-8625, Type II, Class 2
G*		Hard Coat, Anodic	AMS-A-8625, Type III, Class 1
J		Iridite, Gold Over Cadmium Plate Over Electroless Nickel	MIL-C-5541, Class 3 AMS-QQ-P-416, Type II, Class 3 over AMS-C-26074, Class 3 or 4, Grade B
LF		Cadmium Plate, Bright Over Electroless Nickel	1000 Hour Corrosion Resistance
M	N	Electroless Nickel	AMS-C-26074, Class 4, Grade B; & ASTM B733-90, SC2, Type 1, Class 4
N		Cadmium Plate, Olive Drab Over Electroless Nickel	AMS-QQ-P-416, Type II, Class 3 over Electroless Nickel AMS-C-26074
NC		Zinc Cobalt, Dark Olive Drab	96 Hour Corrosion Resistance
NF	W	Cadmium Plate, Olive Drab Over Electroless Nickel	1000 Hour Corrosion Resistance
T		Cadmium Plate, Bright Over Electroless Nickel	AMS-QQ-P-416, Type II, Class 3 over Electroless Nickel, AMS-C-26074, Class 3 or 4, Grade B
U**		Cadmium Plate, Black	AMS-QQ-P-416, Type II, Class 3
ZN		Zinc-Nickel Alloy, Olive Drab	ASTMB 841-91, Over Electroless Nickel 1000 Hour Salt Spray

\* Anodize finish; not suitable for EMI Shielding or grounding applications.  
\*\* Applicable to corrosion resisting steel backshells and accessories. Consult factory for other available finishes.

**STANDARD MATERIALS - BACKSHELLS AND ACCESSORIES**

COMPONENT	MATERIAL	SPECIFICATION
Machined components: such as backshell bodies, fabricated elbows, protective covers, rotatable couplers, dummy stowage receptacles, lock nuts, G-spring support rings, EMI ground rings, grommet followers, etc.	Aluminum	AMS-QQ-A-200 ASTMB221, 209
Die cast components: such as angular backshells, strain relief backshells, strain relief bodies, strain relief saddles, special EMI ground rings, etc.	Aluminum	QQ-A-591 ASTMB85, 26
Backshells or strain reliefs: available in optional corrosion resisting steel; and hardware: such as screws, washers, rivets, wire rope, sash chain, band straps, etc.	Corrosion Resisting Steel	ASTMA582 (300 Series) AMS-QQ-S-763
Elastomeric seals: such as O-rings, cable jacket seals, grommets, etc.	Silicone	ZZ-R-765, MIL-R-25988
Anti-friction and thrust washers	Teflon	TFE
Anti-rotation device	Corrosion Resistant Material	N/A

### NOTES

Unless otherwise specified, the following dimensional tolerances will apply:

$$.xx = \pm .03 \text{ (0.8)}$$

$$.xxx = \pm .015 \text{ (0.4)}$$

$$\text{Lengths} = \pm .060 \text{ (1.52)}$$

$$\text{Angles} = \pm 5^\circ$$

Metric dimensions (mm) are indicated in parentheses

## Banding System Shield Termination Tools

### BAND-IT® Tools and Tool Kits for Reliable Shield Termination

#### Fast, Cost-Effective Termination of EMI/RFI Grounding Shields

The BAND-IT® clamping system provides quick and highly reliable termination of braided metallic shielding or fabric braid. Banding technology was first introduced in our industry in 1985 as a solution to the field repair of magnaformed shield terminations on installed cable assemblies for the B-1 bomber. Banding has been a staple of the industry ever since.

**BAND-IT® clamping bands are precision constructed of 300 Series SST/Passivate I.A.W. AMS 2700, and designed for use with Band-It® Hand Banding Tool or the Pneumatic Banding Tool.**

**The bands are offered in the following four configurations to suit a wide range of requirements: Double-wrapped, the Standard Band will accommodate diameters up to approximately 1.8 inches. The Extended Length Standard Band when double-wrapped will accommodate diameters up to approximately 2.5 inches (63.5mm). The Micro Band will accommodate diameters up to approximately .88 inches (22.5mm) when double-wrapped. The Extended Length Micro Band will accommodate diameters to approximately 1.88 inches (47.8mm) when double-wrapped. All Band-It® clamping bands may be ordered flat or precoiled in bagged and tagged quantities from 1 to 100.**

#### Reliable RFI/EMI/EMP Terminations

The unique low profile and smooth inside diameter of the one-piece type 304 austenitic stainless steel clamping band virtually eliminates RFI/EMI/EMP leakage paths. The lock maintains constant tension under extreme environmental conditions. BAND-IT® has passed severe shock, vibration and thermal cycle testing with negligible deterioration of shell conductivity. Amazingly, the constant tension bands are easily removed with a screw-driver for easy repair of connector contacts

#### Single Piece Band Construction

No welding, soldering, magna forming, and no crimping! The single piece clamping bands are installed with a easy-to-use hand-held tool, or for production quantities, with a bench-mountable pneumatic machine. All versions provide reliable termination of shielding without the expense or inconvenience of high-heat systems.

#### Clamp Small Diameters Easily, Reliably

The secret of the The BAND-IT® clamping system is the innovative double-wrapped band design which provides an extremely high-tension termination without damaging fabric or metal braid materials. As the band tightens in place, the double-wrapped surfaces bear against each other to prevent damage to lightweight screening materials. The clamping band is designed to clamp small diameters as easily, quickly and reliably as large diameters.

#### Quick, Easy Field Terminations with the Precalibrated Hand Tool

The precalibrated hand tool is lightweight and pocket-sized, affording fast braided RFI/EMI/EMP shield termination in the field. The hand-held tool is extremely durable and will provide years of service and thousands of reliable terminations. Glennair is also able to offer its banding customers a fast turnaround repair service for damaged or worn tools.

#### Pneumatic Banding Tool for High-Speed Mass Production

The pneumatic clamping tool offers the capability to tackle high volume braided shielding terminations quickly and easily.

**Reliable termination of EMI shielding to both circular and rectangular banding backshells is easily accomplished in the field with BAND-IT® precalibrated pocket-sized hand tools. High-speed, mass termination production is afforded by the pneumatic clamping tool.**

## Standard Band 600-052 Precoiled Standard Band 600-052-1

**The 600-052 Standard Band** is precision constructed of 300 Series SST/Passivate I.A.W. AMS 2700, and designed for use with the 600-058 Hand Banding Tool or the 600-067 Pneumatic Banding Tool. Double-wrapped bands will accommodate diameters up to approximately 1.8 inches (45.7). Bands may be ordered flat (600-052) or precoiled (600-052-1). Bands come bagged and tagged in quantities from 1 to 100.  
Reference: **BAND-IT®** part number **A10086**

## Extended-Length Standard Band 600-090 Precoiled Extended-Length Standard Band 600-090-1

**The 600-090 Extended Length Standard Band** is precision constructed of 300 Series SST/Passivate I.A.W. AMS 2700, designed for use with the 600-058 Hand Banding Tool or the 600-067 Pneumatic Banding Tool. Double-wrapped bands will accommodate diameters up to approximately 2.5 inches (63.5). Bands may be ordered flat (600-090), or precoiled (600-090-1). Bands come bagged and tagged in quantities from 1 to 100.  
Reference: **BAND-IT®** part number **A11086**

## Micro-Band 600-057 Precoiled Micro-Band 600-057-1

**The 600-057 Micro Band** is precision constructed of 300 Series SST/Passivate I.A.W. AMS 2700, and designed for use with the 600-061 Hand Banding Tool or the 600-068 Pneumatic Banding Tool. Double-wrapped bands will accommodate diameters up to approximately .88 inches (22.4). Bands may be ordered flat (600-057), or precoiled (600-057-1). Bands come bagged and tagged in quantities from 1 to 100.  
Reference: **BAND-IT®** part number **A31186**

## Extended Length Micro-Band 600-083 Precoiled Micro-Band 600-083-1

**The 600-083 Extended Length Micro-Band** is precision constructed of 300 Series SST/Passivate, and designed for use with the 600-061 Hand Banding Tool or the 600-068 Pneumatic Banding Tool. Double-wrapped bands will accommodate diameters up to approximately 1.88 inches (47.8). Bands may be ordered flat (600-083), or precoiled (600-083-1). Bands come bagged and tagged in quantities from 1 to 100.  
Reference: **BAND-IT®** part number **A31089**.

## Hand Banding Tool 600-058

The **600-058 Hand Banding Tool** weighs 1.18 lbs., and is designed for standard clamping bands 600-052 and 600-090 in a tension range from 100 to 180 lbs. Calibrate at 150 lbs.  $\pm$  5 lbs. for most shield terminations. Tool and band should never be lubricated.

Reference: **BAND-IT®** part number A40199.

## Hand Micro Banding Tool 600-061

The **600-061 Hand Micro Banding Tool** weighs 1.18 lbs., and is designed for micro clamping bands 600-057 and 600-083 in a tension range from 50 to 85 lbs. Calibrate at 75lbs +2 lbs. -7 lbs. for most shield terminations. Tool and band should never be lubricated.

Reference: **BAND-IT®** part number A30199.

Metric Dimensions (mm) are indicated in parentheses.

# Banding System Shield Termination Tools User Instructions

1. Prepare Cable Braid for termination process (Figure 1).
2. Push Braid forward over Adapter Retention Lip to the Adapter Incline Point (or .4" [10.2mm] minimum braid length). Milk Braid as required to remove slack and insure a snug fit around the shield termination area (Figure 2).

3. Prepare the Band in the following manner:  
**IMPORTANT:** Due to Connector/Adapter circumference, it may be necessary to prepare the Band around the Cable or Retention Area.

- A. Roll Band through the Buckle Slot twice. (Bands must be double-coiled.)
- B. Pull on Band until Mark (  ) is within approximately .250 inch (6.4mm) of Buckle Slot (Figure 3). The Band may be tightened further if desired.

**NOTE:** Prepared Band should have (  ) Mark visible approximately where shown in Figure 3.

## SHIELD TERMINATION CLAMPING

**PROCESS:** (Figures 4 thru 8):

**NOTE:** To free Tool Handles, move Holding Clips to center of Tool.

4. Squeeze Gripper Release Lever and insert Band into the front end opening of the Tool. (NOTE: Circular portion of looped band must always face downward.)
5. Aligning the Band and Tool with the Shield Termination Area, squeeze Black Pull-Up Handle repeatedly using short strokes until it locks against Tool Body. (This indicates the Band is compressed to the Tool Precalibrated Tension.)  
**NOTE:** If alignment of band and shield is unsatisfactory, tension on band can be relaxed by pushing on slotted release lever on top of tool. Make adjustments as necessary and again squeeze black pull-up handle..
6. Complete the Clamping Process by squeezing the Gray Cut-Off Handle.
7. Remove excess Band from Tool.
8. Inspect Shield Termination.

**IMPORTANT:** Always roll band through the buckle slot twice (see Step 3). Bands must be double-coiled to function correctly. The failure to roll the band through the buckle slot twice is the most common user error in band style terminations.

# Ten Reasons to Keep Glenair at the Top of Your List of Backshell and Connector Accessory Suppliers

- 1. We offer the lowest total cost of ownership in the interconnect industry:** From our cost-saving "no minimum order" policy to our free product samples and application engineering, Glenair provides the best value in backshells and connector accessories available today.
- 2. Our full spectrum product lines make for one-stop-shopping:** We have the most complete selection of rectangular backshells and accessories in the world, including every Mil-Spec slash number and hundreds of composite designs.
- 3. We have the largest capacity, broadest capability factory in the business** and the knowledge and expertise to handle any production requirement no matter how large or complex.
- 4. We've provided complete convenience in ordering since 1956** (that's *your* convenience not ours): choose factory direct, your local Glenair office or your favorite distributor.
- 5. We care as much about quality as you do:** We're BSENISO9001 registered in Europe and MIL-I-45208A and Boeing AQS D1-9000 Certified in North America.
- 6. We have over 35,000 accessory part numbers ready for immediate shipment** including every Mil-C-85049 accessory and thousands of Glenair's most popular rectangular and circular backshell part numbers.
- 7. Our turnaround on quotes and custom orders is the fastest in the industry:** We offer 24 hour turnaround on RFQ's and just 2 to 3 weeks on custom orders, including MIL-DTL-83513 Micro-Ds and other rectangular interconnects.
- 8. We have the largest and most experienced support staff in the business,** including sales and engineering in every major aerospace market, on-site application engineering and dedicated product managers for every interconnect discipline.
- 9. We understand interconnect systems from the ground up:** We're the only backshell and accessory supplier to operate a full service harness facility. We even make our own line of assembly tools.
- 10. We're committed:** Backshells and connector accessories are our life. We've served this market since 1956 and we're committed to meeting the evolving needs of our customers—in both the North America and worldwide marketplace .

*Glenair: A World of Interconnect Solutions*

## D-Subminiature Backshells for MIL-C-24308 Connectors

Glenair®

MIL-DTL-24308  
D-Subminiature

### PRODUCT FEATURES

- Three Optional Cable Entry Locations
- Mechanical and Electrical integrity Maintained by Backshell Entrapment of Connectors
- Split Backshell Designs Provide Easy Assembly and Convenient Service and Maintenance Access
- Wide Selection of Captivated Jackscrews Available
- All Series 55 D-Subminiature Backshells Meet or Exceed FCC Part 15 Subpart J on RS 232, RS 449 and Other Shielding Requirements
- Strain Relief and Shorting Cap Backshells Available

## The World's Largest Selection of D-Sub Backshells, Many In-Stock and Ready for Same-Day Shipment *Designed for MIL-C-24308 (D-Subminiature) applications*

Glenair Series 55 Backshells provide total enclosure of mated plug and receptacle connectors for optimum electromagnetic interference (EMI Shielding) and meet MIL-STD-461 or TEMPEST requirements. A variety of cable/harness shield termination options are offered for overall shields and/or individual shielded complexes. All Series 55 EMI backshells meet or exceed the shielding requirements of FCC Part 15 Subpart J on RS 232, RS 449 and similar installations.

Glenair EMI backshell designs offer proven performance in many severe electromagnetic environments. Optional conductive EMI gaskets are available for installation under the receptacle connector flange to further assure EMI shielding effectiveness.

# D-Subminiature Backshell Exploded View Cable Mounted Plug Front Mounted Receptacle

\*All components front-mounted in relationship to the panel.

D-Subminiature Backshell Exploded View  
Cable Mounted Plug  
Rear Mounted Receptacle

MIL-DTL-24308  
D-Subminiature

\*Note relationship of rear-mounted receptacle to the panel.

## D-Subminiature Backshells Jackscrew Options

### JACKSCREW - STYLE E (END ENTRY)

#### Type J Knurled Slotted Head

All jackscrews have 4-40 UNC-2A threads to mate with M24308/26 female screwlocks or 559-001 mounting kits. Not applicable for cable-to-cable applications.

### MALE JACKSCREW OPTIONS

**Type B**  
Fillister Head

**Type D**  
Drilled  
Fillister Head

**Type E \***  
Extended Knurled  
Slotted Head

**Type H**  
Hex Head

**Type K \***  
Knurled Slotted  
Head

Unless otherwise noted, all jackscrews have 4-40 UNC-2A threads to mate with M24308/26 female screwlocks or 559-001 mounting kits. Not applicable for cable-to-cable applications.

\* Not available for Style "E" (end entry backshells).

### POLARIZING JACKSCREW OPTIONS

**Type F**  
Turnable Male & Female

**Type M**  
Turnable Males

**Type P**  
Fixed Females

**Type L**  
Turnable Females

**Type N**  
Fixed Male & Female

**Type R**  
Fixed Males

1. Metric dimensions (mm) are indicated in parentheses.
2. **DO NOT USE CONNECTORS WITH FLOAT MOUNTINGS.**
3. For front mount, mating connector must be mounted to panel using M24308/26 female screwlocks. For rear mount, use Glenair GK134.
4. For proper termination it is recommended that Glenair 469-001 shield support ring be used on all assemblies. Place ring over wire bundle and under shield, position under G-Spring.

- Metric dimensions (mm) are indicated in parentheses.
- DO NOT USE CONNECTORS WITH FLOAT MOUNTINGS.**
- The Tinel-Lock™ Ring designator must be specified according to the type of cable braid used. Tinel-Lock™ Rings are marked with thermochromic paint which changes color when the correct installation temperature is reached. BI rings are identified with a red spot. CI rings are identified with a blue spot.

\* Raychem Shrink Boot and Epoxy/Polyamide Two Part Adhesive Paste (S1125) Supplied with "T1" Option (See Part Number Development)

\*\* Raychem Shrink Boot and Hot-Melt/Polyolyfin Adhesive Supplied with "T2" Option (See Part Number Development) - This is a Halogen Free System

#### PRODUCT FEATURES

- Top and Side Cable Entry Locations
- Solid and Split Backshell Designs Provide Easy Assembly and Convenient Service and Maintenance Access
- Strain-Relief and EMI Shield Termination Designs
- Qwik-Ty<sup>®</sup>, G-Spring and TAG Ring<sup>®</sup> Configurations

Strain-relief, EMC, banding, solid or split-shell; you name it, we've got it for MIL-C-81659 connectors

***Many part numbers ready for immediate shipment***

Glenair manufactures a full-spectrum line of rectangular backshells for MIL-DTL-81659 connectors. Built from light-weight aluminum alloy and available in a wide range of finishes, our MIL-DTL-81659 backshells provide robust EMI and environmental protection. Solid and split-shell designs are available for cable strain-relief and EMI shield termination.

Top and Side cable entry configurations provide flexibility in contact termination. Selected 81659 backshells, including Qwik-Ty<sup>®</sup>, G-Spring and TAG Ring<sup>®</sup> part numbers are available for immediate shipment from Glenair's Same-Day Delivery Program. Check availability instantly on the Internet at [www.glenair.com](http://www.glenair.com), or call the factory for price and delivery.

# Six Reasons to Choose Glenair as Your Micro-D Supplier

## ***First and foremost, you need recognized performance standards.***

Every element of the MIL-DTL-83513 Micro-D is exactly controlled—from terminal spacing to approved wire termination methods. Standardized measurement and test methodologies ensure consistent, predictable performance throughout this broad family of ruggedized connectors.

## ***Standards are fine, but you also need proven reliability under tough operating conditions.***

While standard SCSI-2 connectors with stamped shells and “tuning fork” contacts may be adequate for use in systems where downtime is not a critical concern, they cannot match the long-term durability and performance advantages of the MIL-DTL-83513 Micro-D, which include:

- Higher current ratings
- Lower circuit resistance
- Superior vibration and shock performance
- Optimized EMI/RFI shielding
- Broader operating temperature ranges
- Better resistance to mechanical damage
- Enhanced corrosion resistance
- Better contact retention
- Better environmental sealing

## ***Third, you need the flexibility of easy customization.***

The ability to design-in a wide range of custom modifications which fit the unique packaging require-

ments of these specialized applications is a distinct advantage of the Glenair Micro-D—making it the connector of choice for many unique or small quantity applications.

## ***Fourth, you need high temperature tolerance.***

Heat from electrical or environmental sources can soften mated contacts over time and reduce contact retention force. But materials selection and advanced fabrication and heat treating techniques enable Glenair’s TwistPin contact to resist high temperature stress relaxation for up to 1000 hours at 125° C and thus perform at levels unmatched by other contact designs.

## ***Fifth, you need trouble-free mating and un-mating.***

Glenair has perfected a nickel underplating combined with a proprietary duplex gold overplating which provides optimal contact lubricity (anti-galling) and effectively eliminates the oxidation common to copper flash underplating. Glenair 100 contact Micro-D connectors have been successfully tested to 25,550 mating cycles (test report ER1010) proving the durability of the Glenair plating process.

## ***Finally you need availability.***

Glenair has built its reputation on fast turnaround on quotes and custom orders. We also maintain the world’s largest inventory of Micro-D connectors and accessories, all available for immediate same day shipment with no quantity or price minimums.

*Glenair: A World of Interconnect Solutions*

#### PRODUCT FEATURES

- Single, Dual and Elliptical Cable Entries in Top, Side and 45° Configurations
- Split Backshell Designs Provide Easy Assembly and Convenient Service and Maintenance Access
- Wide Selection of Captivated Jackscrews Available
- Metal and Composite Versions
- Strain Relief and Shorting Cap Backshells Available

## The World's Largest Selection of Micro-D Backshells, Many Ready for Same-Day Shipment *Designed for both MIL-DTL-83513 and Glenair COTS Microminature Connector applications*

Our comprehensive Micro-D backshell and accessory offerings include mounting hardware, EMI banding shells, switching shells, potting shells, protective covers and connector savers. Glenair Series 500 Backshells provide total enclosure of mated plug and receptacle connectors for optimum electromagnetic interference (EMI Shielding). EMI bands and installation tools are sold separately. Metal and composite backshells are available with a variety of cable/harness shield termination options for both overall shields and/or individual shielded complexes. Glenair Series 500 Micro-D backshell designs offer proven performance in many severe electromagnetic environments.

\*Glenair recommends elliptical style backshell

### NOTES:

1. This sizing chart is for discrete wire bundles of the type and gauge indicated. When using twisted pairs, or other wire types/configurations, refer to Glenair Circular Connector Backshells & Accessories catalog, page 8, "Calculating Wire Bundle Diameter." Glenair recommends 70% area fill (wire bundle area to entry port area), not to exceed 80% area fill on Micro-D Backshells.
2. When solder-cup Micro-D connectors and low-profile backshells (short in height) are used in conjunction, the transition angle from the outer pins to the centralized entry port becomes severe and can increase the susceptibility to damage. Glenair recommends elliptical shaped entries to minimize angles of contact that can occur with round cable entries.
3. Blending and deburring/smoothing of internal geometry may not produce "perfectly" smooth, rounded features, but has a proven history of success in precluding wire abrasion damage. For additional wire protection, wrap wire bundle with Kapton tape in areas that may come into contact with cable entry transitions or other interior angles.
4. Glenair recommends that harness designs avoid excessive fill percentages and severe contact angles as previously described. For applications where these conditions must exist, consult our factory for appropriate additional design / workmanship solutions

## Micro-D Backshells and Accessories Standard Materials and Hardware

### BACKSHELL FINISH OPTIONS

Symbol	Finish	Specification
C	Black Anodize	AMS-A-8625, Type II, Class 2
E	Chem Film	MIL-DTL-5541, Class 3

### EMI BANDING ACCESSORIES

EMI backshells are designed for use with stainless steel shield termination bands. This banding system provides a fast, easy method of attaching cable braided shields to the backshell. See Glennair's *Backshell Assembly Tools, Banding Tools and Accessories Catalog* for complete product information.

Micro-D

## MOLDED PLASTIC DUST CAPS

Anti-static Micro-D dust caps are available to fit all sizes of Metal Shell Micro-D connectors. These dust caps are injection-molded from a rugged plastic material that resists cracking and provides protection.

Material: Polypropylene, anti-static, color black.

## MICRO-D INTERFACIAL SEALS FOR MWDM SOCKET CONNECTORS

Micro-D interfacial seals are available for metal shell socket connectors. Intended for use as field replacements for damaged seals, these seals are molded from fluorosilicone elastomer and meet NASA outgassing requirements.

Material: Blue fluorosilicone per ZZ-R-765.

## 500-010 EMI/RFI Micro-D Banding Backshell Round Cable Entry

**Glenair's Most Popular Micro-D Backshell** is stocked in all sizes. Choose straight, side or 45° cable entry.

**Rugged One-Piece Aluminum shell** with stainless steel hardware, available in standard nickel plating, or choose optional finishes.

**17-7PH Stainless Steel Clips** attach the backshell to the connector. These backshells accept standard and micro BandMaster™ ATS shield termination straps.

Note: It is easy to exceed the maximum allowable wire bundle diameter for the cable entry on these miniaturized backshells. Please see the table on C-3 for assistance, or choose an elliptical backshell entry design instead.

How To Order EMI/RFI Backshells

### Notes

- Assembly identified with manufacturer's name and P/N
- 51-2 shell size is for a special 51 position 2 row Micro D connector
- Knurled or ribbed banding platform - manufactures option
- EMI gasket mounts between mating connector and panel

### Materials/Finish

- Shell: Aluminum Alloy 6061 -T6 Per QQ-A-200, QQ-A-225 (Machined Components)  
Aluminum Alloy 6061-T6 Per QQ-A-591 (A380) (Die-Cast Components)
- Clips, E-Rings: 17-7PH Stainless Steel
- Jackscrews, Washers, Jackposts: 300 Series Stainless Steel, Passivated

# 507-088 EMI/RFI Composite Micro-D Banding Backshell

MIL-DTL-83513  
Micro-D

Composite shielded backshells offer over 40% weight savings compared to aluminum versions.

These composite backshells meet the requirements of SAE AIR 4567 and MIL-DTL-85049.

Available in a full range of sizes and options, composite backshells are designed for use with Glenair's EMI banding system for shield termination.

**Material:** High Grade Engineering Thermoplastic

**Finish:** Electroless Nickel

# 507-035 Micro-D Potting Shell

MIL-DTL-83513  
Micro-D

Potting shells are designed to be used with solder cup Micro-D connectors. The potting shell is attached to the connector and filled with encapsulating compounds such as epoxy or RTV. The potting shell is supplied with integral jackscrews and provides a convenient way to protect the exposed solder cup contacts. The low profile shell requires minimal clearance and is made of machined aluminum.

# "Marshal Bean" Protective Rubber Covers with Tether Rope 780-555

*Fits Metal Shell  
M83513 Type  
Connectors*

### Rubber Covers for Tactical Equipment and Field Instruments

– These friction-fit covers provide dust and splash protection.

**Two Tether Styles** – Choose ring terminals for attachment to a panel, or choose slip knots for cable attachment.

**-55° to +125° Temperature Range**

### MATERIALS & FINISHES

Cover	SBR Rubber Per ASTM D2000 Type C
Cord	Nylon Per MIL-C-43307
Ring Terminal	Stainless Steel
Slip Collar	Kynar
Crimp Ring	Copper, Black Oxide Finish

Standard material contains trace amounts of sulfur (a vulcanizing agent) which is known to contribute to degradation/corrosion of silver plated components such as braid, etc. Specify MOD Code suffix -675 for sulfur-free material.

### PRODUCT FEATURES

- Split and Solid Backshell Assembly Designs
- Mechanical and Electrical Integrity Maintained by Backshell Entrapment of Connectors
- Lightweight Aluminum Construction
- All Standard Materials and Finishes Available
- Passivated Stainless Steel Backshell Hardware

## Selection of Rectangular Backshell Assemblies Designed for MIL-DTL-83527/A, Radiall, Hughes MRS, Boeing and Amphenol Connectors

This section features a selection of split and solid Multiple and Single-Entry Backshell Assemblies designed for various connectors such as MIL-C-83527/A; Radiall 617 610 058 & -059; Radiall EPX2 Non-Environmental; Radiall EPXB; Radiall 617 610 100; Radiall 617 610 127 (EPXP Type); Hughes MRS; Boeing BACC65; Hughes RA (M28840/4, Dash Numbers 2 & 5; Amphenol 126-20753, Dash Numbers 2 & 5, 126-20910, 126-20913 and 126-20914.

Made from lightweight aluminum alloy, the backshells are available in a full range of standard finishes. Please consult factory for custom finish options. Backshell hardware is passivated stainless steel. Some designs ship with an RFI-EMI Gasket.

# Ten Reasons to Keep Glenair at the Top of Your List of Backshell and Connector Accessory Suppliers

- 1. We offer the lowest total cost of ownership in the interconnect industry:** From our cost-saving “no minimum order” policy to our free product samples and application engineering, Glenair provides the best value in backshells and connector accessories available today.
- 2. Our full spectrum product lines make for one-stop-shopping:** We have the most complete selection of rectangular backshells and accessories in the world, including every Mil-Spec slash number and hundreds of composite designs.
- 3. We have the largest capacity, broadest capability factory in the business** and the knowledge and expertise to handle any production requirement no matter how large or complex.
- 4. We’ve provided complete convenience in ordering since 1956** (that’s *your* convenience not ours): choose factory direct, your local Glenair office or your favorite distributor.
- 5. We care as much about quality as you do:** We’re BSENISO9001 registered in Europe and MIL-I-45208A and Boeing AQS D1-9000 Certified in North America.
- 6. We have over 35,000 accessory part numbers ready for immediate shipment** including every Mil-DTL-85049 accessory and thousands of Glenair’s most popular rectangular and circular backshell part numbers.
- 7. Our turnaround on quotes and custom orders is the fastest in the industry:** We offer 24 hour turnaround on RFQ’s and just 2 to 3 weeks on custom orders, including MIL-DTL-83513 Micro-Ds and other rectangular interconnects.
- 8. We have the largest and most experienced support staff in the business,** including sales and engineering in every major aerospace market, on-site application engineering and dedicated product managers for every interconnect discipline.
- 9. We understand interconnect systems from the ground up:** We’re the only backshell and accessory supplier to operate a full service harness facility. We even make our own line of assembly tools.
- 10. We’re committed:** Backshells and connector accessories are our life. We’ve served this market since 1956 and we’re committed to meeting the evolving needs of our customers—in both the North America and worldwide marketplace .

*Glenair: A World of Interconnect Solutions*

**MIL-C-83733 BACKSHELL PRODUCT FEATURES**

- Six Optional Side and Top Cable Entries
- Solid and Split Backshell Designs Provide Easy Assembly and Convenient Service and Maintenance Access
- Strain-Relief and EMI Shield Termination Designs
- Lamp Thread, Conical Ring and Banding Shield Terminations

## Six Optional Cable Entries for Flexible Wire Routing *Cable Strain Relief and RFI/EMI Shield Termination for MIL-DTL-83733 Connectors*

Glenair's split backshells for MIL-DTL-83733 connectors are available in three designs which offer either a standard cable clamp, saddle-bar style strain-relief, or an EMI shield banding platform. Tongue and groove joints provide optimal EMC. Customers may choose from up to six cable entry locations.

Backshell bodies are made from aluminum alloy with passivated stainless steel hardware. A full range of standard finishes are available, including custom options.

**PRODUCT FEATURES**

- Dozens of Cable Entry Locations
- Mechanical and Electrical Integrity Maintained by Backshell Entrapment of Connectors
- Split Backshell Designs Provide Easy Assembly and Convenient Service and Maintenance Access
- Standard Clamp and Gland Style Strain-Reliefs
- Banding and Braid-Sock Style Shield Terminations

## The Perfect Solution for Rack and Panel Avionic Applications: an ARINC Series 600 Connector Protected by a Glenair RFI/EMI Backshell

### *Cost-Effective RFI/EMI Shielding and Cable Strain Relief*

Glenair’s Series 527 backshells are the perfect complement to size 1, 2 and 3 ARINC Series 600 connectors. Built from rugged aluminum and available in a complete range of surface finishes, Glenair’s line of accessories for ARINC Series 600 connectors provide cost-effective cable strain-relief and RFI/EMI shielding. Many popular part numbers are in stock and ready for immediate shipment from Glenair’s 35,000 part number Same Day Inventory.

**TABLE IV: CONNECTOR DESIGNATOR**

ARINC 600 series connector backshells are designed to replace the insert retainer plates for connector designators P, P1, P3 and P5 (P2 and P6 backshells require the use of the connector manufacturer's retainer plates). Due to non-standard modifications by the connector manufacturer, the backshell may require special design alterations to mate properly. The following should be used to determine if a backshell modification is required. Prior to ordering, consult factory with connector part numbers not shown to ensure a proper fit

Connector Designator	Connector Description
P	All Manufacturer's Plug and Receptacle Shells, Except for Those Listed Below (Prior to ordering, consult factory with connector part numbers not listed below to ensure a proper fit.)

Metric dimensions (mm) are indicated in parentheses.

### PRODUCT FEATURES

- Top, Side and 45° Cable Entry Locations
- Mechanical and Electrical Integrity Maintained by Backshell Entrapment of Connectors
- Split Backshell Designs Provide Easy Assembly and Convenient Service and Maintenance Access
- Wide Selection of Material Finishes
- Special Tag®-Ring and G-Spring EMI/RFI Shield Termination Backshells
- Saddle Clamp and Gland Nut Strain Relief Backshells Available

## Strain-Reliefs, Shorting Caps, G-Springs, Solid and Split-Shell Designs—everything for the ARINC Series 400 Style Interconnect Assembly

### *Complete Selection Includes Every Functional Requirement*

Glenair's line of RFI/EMI backshells for Cannon DPKA, DPKB, DPJM, DPXA, DPX3, DPX4 and DL2-96 connectors is very complete.

Every functional requirement - from overall and individual shield termination to basic saddle-bar style strain-relief is included in Glenair's backshell series for ARINC 400 type connectors.

The backshells are built from rugged aluminum alloy and are available in all common surface finishes and cable entry configurations.

# When you think Micro-D, do you think Glenair?

## Our Same-Day Shipment inventory is bound to change your answer

**G**lenair is committed to building full-spectrum product lines which truly meet your every requirement. That's why we expanded our family of Micro-D Sav-Cons<sup>®</sup> and backshells to include a complete range of MIL-DTL-83513 qualified Micro-d connectors.

And the best part of all, we've put the entire product line in stock for immediate delivery.

So, from backshells and mounting hardware to pre-wired connectors and custom cable assemblies, when you think Micro-D, think Glenair.

MIL-DTL-83513 & BS9523F002 Micro-D

Metal or composite thermo-plastic construction

Complete selection of top, 90° & 45° cable entries

Optional shield banding termination systems

Spring retaining clips captivate the connector

Micro-D connectors and accessories in Stock

**PRODUCT FEATURES**

- **Top, Side and 45° Cable Entries**
- **Mechanical and Electrical Integrity Maintained by Backshell Entrapment of Connectors**
- **Split Backshell Designs Provide Easy Assembly and Convenient Service and Maintenance Access**
- **New Composite Design Available for LPMY22**
- **Strain Relief and Shorting Cap Backshells Available**
- **Conical-Ring Style EMI/RFI Shielded Terminations**

## The Right Accessory for Every Hypertronics NEBY, NPBY, LPMY and NPJY Connector

### *New LPMY22 composite backshell now available!*

Glenair backshells and protective covers for Hypertronics connectors are built from either rugged aluminum alloy or composite thermoplastic. The full range of plating options are available as are custom finishes. Strain-relief backshells feature potting holes and top and 45° cable entry styles.

507-195 EMI/RFI Micro-D Split Backshell Assembly with Clamp and Gland Nut Style Strain-Relief.....	C-44
500-056 EMI/RFI Backpanel Mount Micro-D Backshell with Qwik-Ty® Strain-Relief.....	C-46
780-555 "Marshal Bean" Protective Rubber Cover Universal Micro-D for MIL-C-83513 Connectors.....	C-48

Miscellaneous Rectangular Backshells.....	D-1
527-002 Split Backshell with Strain-Relief for MIL-C-83527/A Connectors.....	D-2
527-169 EMI/RFI Banding Backshell Assembly for Radial 617 610-058 & -059 Connectors.....	D-3
527-220 Strain-Relief Backshell for Hughes MRS Connectors.....	D-4
527-238 EMI/RFI Strain-Relief Backshell Assembly for Radial EPX2 Non-Environmental Connector.....	D-6
527-243 EMI/RFI Strain-Relief Backshell Assembly for Radial EPX2 Non-Environmental Connector.....	D-7
527-251 EMI-RFI Banding Backshell Assembly for Boeing BACC65 Connector.....	D-8
527-254 EMI-RFI Strain-Relief Backshell Assembly for Boeing BACC65 Connector.....	D-9
527-255 EMI/RFI Strain-Relief Banding Backshell for Radial EPXB Connector.....	D-10
527-260 EMI/RFI Qwik-Ty® Elliptical Banding Backshell for Boeing BACC65 Connector.....	D-11
527-260 EMI/RFI Qwik-Ty® 45° & 90° Elliptical Banding Backshell for Boeing BACC65 Connector.....	D-12
527-268 EMI-RFI Qwik-Ty® Banding Backshell for Radial EPXB Connector.....	D-13
527-276 EMI/RFI Banding Backshell for Radial EPXB Connector.....	D-14
527-265 EMI/RFI Elliptical Qwik-Ty® Straight Banding Backshell for Boeing BACC65 and Radial 617610100 Connectors.....	D-15
527-280 EMI/RFI Split Qwik-Ty® Banding Backshell for Radial 617 610 127 ( EPXB Type) Connector.....	D-16
527-281 EMI/RFI Qwik-Ty® Elliptical Banding Backshell for Boeing BACC65 & Radial EPXB Connector.....	D-17
527-287 Split Backshell Straight, 45°, & 90° Entry for Hughes MRS Pin Body Connectors.....	D-18
527-288 Split Backshell Straight, 45°, & 90° Entry for Hughes MRS Pin Body Connectors.....	D-20
527-296 Split Backshell with Accessory Thread for Hughes RA Connector M28804/4, Dash Numbers 2 & 5.....	D-22
527-297 Split Backshell with Accessory Thread for Amphenol 126-20753, 2&5, 126-20910, 126-20913, and 126-20914 Connectors.....	D-23
527-197 Strain-Relief Backshell for Hughes MRS Connectors.....	D-24
527-303 Split Backshell Straight, 45°, & 90° Entry with Accessory Thread for Hughes MRS Pin Body Connectors.....	D-26
780-510 "Marshal Bean" Protective Rubber Cover Universal Rectangular for All Rectangularly-Shaped Connectors.....	D-28
