COMPONENTS & PARTS / SOCKETS/CONNECTORS / IC SOCKET - FOR 20-PIN 0.3" CHIPS - PACK OF 3

DESCRIPTION

An IC (Integrated Circuit) socket allows you to insert and remove chips easily from an assembled kit or project

This item contains 3 of the 20 pin 0.3" wide version. Best used with chips that have 20 pins (2x10) and have 0.3" pin spacing.

These are often used for soldering into a Perma Proto or PCB so that you can replace and swap chips easily. What's nice about IC sockets is that they are the same pin spacing and size so you don't have to redesign the board! For our example photo, we put the socket into an Adafruit Perma-Proto Breadboard but any solderable PCB or protoboard will work great. Not recommended for solderless breadboards, the pins are not long enough.

IC Socket - for 20-pin 0.3" Chips - Pack of 3

PRODUCT ID: 2204

There are multiple versions of this item. Please select one from the options below:

for 08-pin 0.3" Chips
for 16-pin 0.3" Chips
for 20-pin 0.3" Chips
for 28-pin 0.3" Chips
for 28-pin 0.6" Chips
for 40-pin 0.6" Chips
