### DESCRIPTION

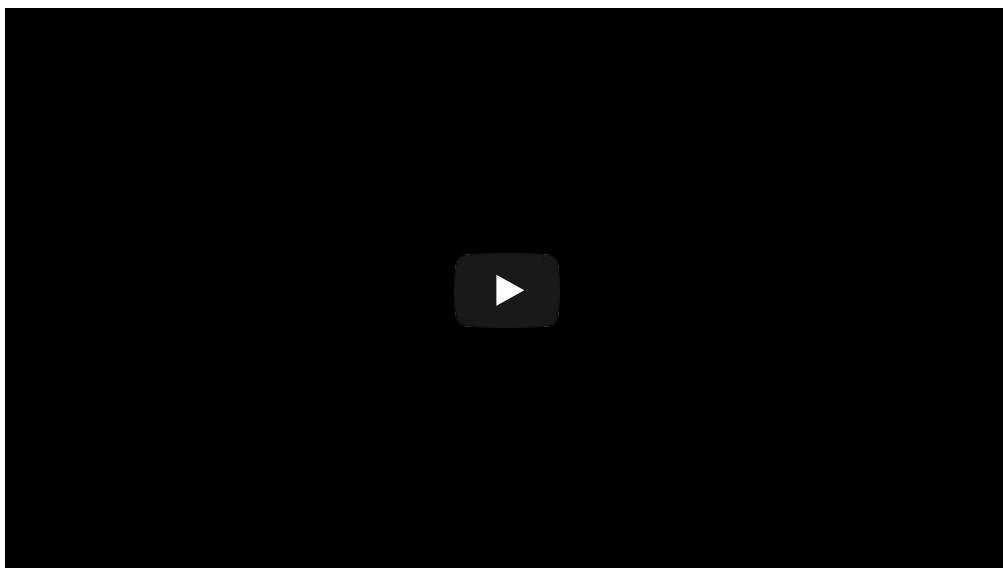

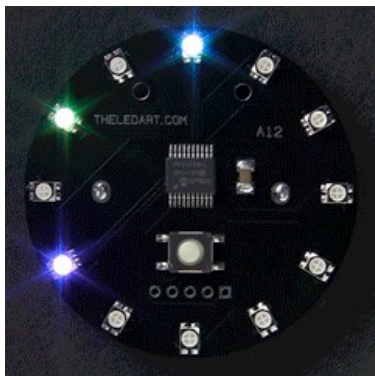

## DESCRIPTION

Akimitsu "The LED Artist" Sadoi is a local New York artist who designs and makes beautiful LED art. We're excited to carry his lovely new wearable designs. The A12 is a wearable ring, a little less than 2" diameter, that has 12 RGB LEDs that animate and sparkle. Comes fully assembled and with a non-rechargeable CR2450 coin cell.

- 12 full-color LEDs produce beautiful colors.
- Comes with a non-rechargeable battery (CR2450, easily replaceable).
- Battery will typically last about 5 hours continuously.
- Also comes with black cord (lanyard) to hang around your neck.
- 10 beautiful animation patterns pre-programmed.
- Demo mode automatically runs through all animation patterns – changes every minute. (Activated by holding the button at the startup.)

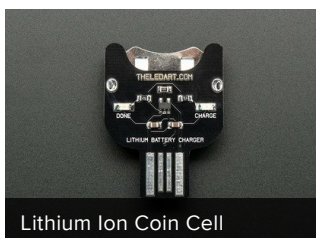

lights the LEDs brighter, as it has higher voltage.

- The charger for the above is also available.
- Dimension: 1.9 inch diameter, 0.4 inch thick (including the battery)

The LED Artist A12 - RGB LED Wearable (13:35)
