

HDMI TO VGA

Leaded HDMI to SVGA convertors

The NEWLink HDMI to VGA convertor can convert the digital HDMI signal coming from your PC into an analogue VGA signal. This allows you to plug your modern laptop or games console to an older monitor or projector.

On some models you can not only enjoy a high definition image, but also audio from the 3.5mm stereo socket. Some HDMI sources can supply the power needed to operate a converter but you can connect the convertor to a PC or power adaptor using the provided Micro USB cable.

On the rare occurrence the HDMI source does not provide enough power through the HDMI port, it is possible to power the convertor with the supplied USB cable.

Features:

- Easy to Use: Installs in seconds, does not need drivers
- Conversion: It can convert complete HDMI into VGA video
- Leaded type adaptor with a built-in cable
- Input: HDMI signal, USB power (depending on model bought)
- Output: SVGA signal, 3.5mm stereo (depending on model bought)
