

DESCRIPTION

Honeywell's AML (Advanced Manual Line) Series of commercial grade operator interface switches offers a variety of pushbutton switches, key lock switches, paddle switches, rocker switches, and indicators. Pushbutton switches are offered as momentary action or alternate action (push-on, push-off). The AML Series switches are available with contacts for controlling logic level or power-duty electrical loads. Up to four poles are available on select AML series for control or signaling applications. When lighted switches are required, incandescent, LED, or neon lamps are available to satisfy the supply voltage requirements for the application. A wide variety of pushbutton lens, paddle switch covers, and rocker switch covers are available for lighted or unlighted applications and with or without legends. The switches and indicators snap into the panel from the front for ease of installation and require less than 44,45 mm [1.75 in] panel depth including termination.

Honeywell AML switches are UL and CSA certified as noted on page 3 of the specifications.

DIFFERENTIATION

- A 4PDT contact option available for most AML switches
- Lamp package options for up to 250 Vac
- Key selector switches

VALUE TO CUSTOMERS

- Well suited for power-duty and logic-level loads
- Rectangular or square front-of-panel pushbutton design
- Standard rectangular design for pushbuttons, paddle, or rocker switches

FEATURES

- Pushbuttons, paddles, rockers, key-actuated, and indicators within AML Series for coordinated panel appearance
- Less than 1.75 inch panel depth
- Pushbuttons, paddles, and rockers furnished lighted or unlighted
- Lighted switches furnished with choice of incandescent, LED, or neon lamps dependent upon supply voltage
- Pushbuttons available with momentary or alternate action (push-on and push-off)
- Paddle, rocker, and key switches with two or three positions and maintained or momentary action
- One-, two-, or four-poles with double throw available for most switches
- Fine silver contacts for switching electrical loads, optional gold contacts for logic level applications
- AML20 Series standard-duty electrical rating or AML30 Series power-duty electrical rating (reference page 4)
- AML40 Series indicators with incandescent or LED displays
- Optional fabricated metal frames (AML61 Series) for strip mounting multiple AML switches
- Wide variety of accessories, including switch guards and panel seals
- UL and CSA certified

POTENTIAL APPLICATIONS

- Agriculture
- Food and beverage
- Medical equipment
- Industrial equipment
- Process controls
- Oil and gas
- Military
- Aerospace
- Transportation

PORTFOLIO

The AML Series of pushbutton switches are a portion of Honeywell's breadth of operator interface controls. Other operator interface controls are rocker switches, an extensive line of toggle switches and specialty operator controls.

Instructions

- Fill in appropriate catalog listing - one listing/sheet.
- Check proper figure #, Type size, Type color.
- Fill in quantity required.
- Indicate legends desired - Do not exceed maximums shown in legend order guide.

Note

- For proper legend orientation, AML housings (when viewed from front of panel) should have "MICRO SWITCH" logo oriented "Up" on square devices and "Up" or the "LEFT" on rectangular devices.
- Please use black ink in filling out this form to help us process your order.
- * INSERT ONLY ON STYLE A & H BUTTON.

Modified Gothic lettering (A thru Z), numerals (0 thru 9) and Symbols below available in 5/64, 7/64, 9/64, 13/64 and 5/16.

	AML78CB	Std. bezel	Square panel plug, black matte finish	Same height as the "Std" bezel
	AML78FB	Std. bezel	Rectangular panel plug, black matte finish	Same height as the "Std" bezel
	AML91LA86	-	6.3 V incandescent T-1 3/4 wedge base lamp	#86 Lamp
	AML91LA73	-	14 V incandescent T-1 3/4 wedge base lamp	#73 Lamp
	AML91LA85	-	28 V incandescent T-1 3/4 wedge base lamp	#85 Lamp
	AML92ERL	Six chip	Red LED, T-1 3/4 wedge base lamp High intensity	*Requires external series current limiting resistor
	AML92EGL	Six chip	Green LED, T-1 3/4 wedge base lamp High intensity	*Requires external series current limiting resistor
	AML92EYL	Six chip	Yellow LED, T-1 3/4 wedge base lamp High intensity	*Requires external series current limiting resistor
	AML92EWL	Six chip	White LED, T-1 3/4 wedge base lamp High intensity	*Requires external series current limiting resistor

*The LED did not include an internal resistor. A suitable external resistor must be added to the LED circuit limiting the current to 50 mA

¹Barriers are designed to prevent inadvertent actuation of adjacent mounted switches.

Table 48. Integral LEDs

LEDs Furnished Permanently Installed in These Products	V ₁	I ₁	V _{PD}	Peak Inverse Voltage	
				Without Diode Protection	With Diode Protection
AML 22, 25, 26, 42	2.4V	20mA	0.7V	5V	34V
AML45	2.4V	20mA	0.7V	4V	33V

100,000 hours (half life)

AML92 SERIES LEDs

For use with these AML switches and indicators equipped with lamp sockets:

- **Pushbuttons switches:** AML21 rectangular and square, and AML31
- **Paddle switches:** AML23/33
- **Rocker Switches:** AML 24/34
- **Indicators:** AML41

Table 49. AML92 Operating Characteristics

Type	V _F Forward Voltage (typ.)				I _F Forward Current	V _R Reverse Voltage
	Yellow	Green	Red	White		
Six chip	4 V	4 V	4 V	4 V	50 mA	5.6 V

Operating Temperature Range: -20 °C to 60 °C [-4 °F to 140 °F]

Storage Temperature Range: -30 °C to 100 °C [-22 °F to 212 °F]

LED Application Information

For those devices without internal current limiting resistors, suitable external control of the LED current must be provided. It is recommended that a minimum of 5 Vdc open circuit voltage with an appropriate series resistance be used to drive LED devices. This minimizes the effect of temperature (current variation) on forward voltage of the LED.

Resistor values can be determined by supply voltage or current for LED:

Where: R_s = Series Resistance

E = Supply Voltage

V_f = Forward Voltage of LED

I_f = Circuit Current

If a diode is added in series for reverse polarity protection, then:

$$R_s = \frac{E - V_f - V_{PD}}{I_f}$$

Where: V_{PD} = Forward Voltage of Protection Diode

**⚠ WARNING
PERSONAL INJURY**

DO NOT USE these products as safety or emergency stop devices or in any other application where failure of the product could result in personal injury.

Failure to comply with these instructions could result in death or serious injury.

**⚠ WARNING
MISUSE OF DOCUMENTATION**

- The information presented in this product sheet is for reference only. Do not use this document as a product installation guide.
- Complete installation, operation, and maintenance information is provided in the instructions supplied with each product.

Failure to comply with these instructions could result in death or serious injury.

Warranty/Remedy

Honeywell warrants goods of its manufacture as being free of defective materials and faulty workmanship during the applicable warranty period. Honeywell's standard product warranty applies unless agreed to otherwise by Honeywell in writing; please refer to your order acknowledgment or consult your local sales office for specific warranty details. If warranted goods are returned to Honeywell during the period of coverage, Honeywell will repair or replace, at its option, without charge those items that Honeywell, in its sole discretion, finds defective. **The foregoing is buyer's sole remedy and is in lieu of all other warranties, expressed or implied, including those of merchantability and fitness for a particular purpose. In no event shall Honeywell be liable for consequential, special, or indirect damages.**

While Honeywell may provide application assistance personally, through our literature and the Honeywell web site, it is buyer's sole responsibility to determine the suitability of the product in the application.

Specifications may change without notice. The information we supply is believed to be accurate and reliable as of this writing. However, Honeywell assumes no responsibility for its use.
