RS Stock No.: 482-7742

RS Professionally Approved Products bring to you professional quality parts across all product categories. Our product range has been tested by engineers and provides a comparable quality to the leading brands without paying a premium price.

Product Description

From the trusted and professional brand RS PRO comes this 3240-piece kit of slotted pan head machine screws in a range of threads and lengths, nuts and washers. Machine screws are used in threaded holes, which can provide a stronger joint between the screw and the material it is driven into. This, combined with the full screw thread, will therefore translate to a higher quality finish and therefore a higher quality product overall.
