Article Label-Off

Available sizes 200ml, 400ml

Product description / Please note

With LABEL-OFF the tiresome removal of adhesive paper labels from all kind of material becomes easy and quick without damaging the surface. The highly active desolving substance penetrates the paper and neutralizes the label's adhesive strength. Residues of glue can easily be wiped off using a cloth of paper with LABEL-OFF. Due to the strong dissolving power of LABEL-OFF, a few materials such as polystyrene may be attacked by the substance. In case of doubt, test on a small area.

Application

LABEL-OFF has been developed for the removal of adhesive paper labels of all kinds. It has been proved in the home and gift shops, as well as in the handicraft trade and in the office. Spray thoroughly on the label to be removed. For accurate work use the attached extension tube. Allow LABEL-OFF to act until paper is well soaked (approx. 4 min). Remove paper and wipe off remaining glue. If some residues remain, repeat procedure.

Pysical Properties

ColorcolorlessDensity0,69 [g/cm³]Odorthat of orange

Evaporation rate slow

Compatibility with materials excellent: glass, metal, hardened laquer

good: plastic, e.g. PVC, acrylate, ABS not compatible: polystyrene, polycarbonate

Storage / Shelf life

Shelf life is 2 years if stored correctly.

Package after emptying to be disposed via metal scrap.
