

EU Declaration of Conformity (DoC)

Product Description

Siretta pigtail assemblies are made from high quality components and assembly methods to control VSWR and Return Loss. Cable sizes between 0.81MM and RG174 are available. Various connector types can be chosen to suit: PCB mount, case mount or free movement types.

Product Declaration

This declaration of conformity is issued under the sole responsibility of the manufacturer. The object of the declaration described above is in conformity with the relevant community harmonised standards:

The Restriction of Hazardous Substances (RoHS) Directive 2011/65/EU and Amendment (EU) 2015/863

RoHS exemption statement

Lead is specifically regulated by the RoHS Directive for Electric and Electronic Equipment. However, there is an Exemption (6c) that allow higher concentrations for certain parts, components, use cases and functions. This RoHS Exemption expires on 21 July 2026. Siretta and the wider electronics industry are working to reduce the lead content in these parts to below 0.1% as soon as possible.

Lead (CAS Number 7439-92-1) is used internally as an alloy in brass and copper in some of our components. This is not expected to be released during normal operation. We recommend reading the Siretta Device Safety and Product Care information which can be found at <https://www.siretta.com/go> before use and recycling using a WEEE certified agent.
