Safely Test High-Power Devices

Power and characterize up to 800 W safely and easily with our new auto-ranging benchtop power supply.

The Keysight E36150 Series autoranging benchtop power supply features two models with 800 W power on a single channel output. These power supplies provide up to 60 V and 80 A to give you plenty of usable power to meet your testing needs.

The E36150 Series new power supplies also provide advanced characterization and power simulation capabilities. These include voltage and current meter, data logging, scope view, and an arbitrary waveform generator (AWG). Feature-packed to deliver high performance, the E36150 Series provides a one-box solution that eliminates the demand of having to meet the requirements of multiple instruments.

The E36150 Series power supplies are designed for versatility and are perfect for various applications, including R&D, design validation, reliability, and quality testing across all types of industries. The solution features an autoranging architecture and peak power handling capabilities enabling you to meet your various test requirements with plenty of usable power and flexibility.

Reducing cabling complexity

- Enables easy access to power outputs to connect and disconnect the device under test (DUT) quickly and safely with its front-panel, high-current detachable binding post.
- Withstands maximum current output of 80 A while being fully compliant with the International Electrotechnical Commission (IEC) 61010 safety requirements.

Advanced power control and analysis (Keysight PathWave BenchVue BV9200B / BV9201B)

- Advanced tools for data logging, oscilloscope, arbitrary waveform generator (AWG), and complementary cumulative distribution function (CCDF) statistical analysis — no additional programming required.
- Convenient access with a familiar PC control interface using the compatible PathWave BenchVue BV9200 / BV9201B software.

Peak power-handling capabilities

- Power up to safely test your electromechanical or high-capacitance devices that require a quick surge of power.
- Accommodate power surges of up to three times its 800 W rated output, delivering a total of 2400 W for at least seven milliseconds.

DAQ970A and DAQ973A Data Acquisition System

Get the next-generation Keysight data acquisition (DAQ) system with a three-slot mainframe and your choice of nine plug-in modules. Interface with the DAQ using BenchVue DAQ software, the intuitive graphical front panel with task-oriented, self-guiding menus, or a web browser.

- Features an advanced 6.5-digit internal DMM with improved accuracy and faster measurement speed (50,000 readings / second) to sample more signals.
- Measures very low current ranges (1 μ A DC and 100 μ A AC) and higher resistance range (1,000 M Ω).
- Compensates using new auto-calibration for internal drifts caused by time and temperature changes.
- Comes with additional GPIB for the DAQ973A; easy connectivity to your PC with LAN and USB.
- Code compatible with Keysight 34970A / 34972A.
- Each module updated with improved switching speeds and accuracies.
- Fast Keysight DAQM900A solid-state multiplexer with scan rate speed of up to 450 channels / second.
- New Keysight DAQM909A 4-channel simultaneous sampling digitizer module with a sampling rate of up to 800 kSa / second.

N6700 Modular Power System

N6700: DC power supply — ideal for automated test systems.

- Small 1U mainframe (400, 600, 1200 W) holds up to four output modules.
- Over 35 programmable DC modules offer unique capabilities, performance, voltage, and current combinations.
- Multiple DC electronic load modules, 100 and 200 W, allow current to be sourced and sinked in the same mainframe.

N6705C: DC power analyzer — deep insight without a complex test system.

- Holds and uses up to four N6700 Series modules (600 W total).
- Integrates digital multimeter (DMM), oscilloscope, arb, and data logger capabilities.
- Characterizes and improves battery run time with a source / measure unit (SMU) and BV9200B analysis software.

Solving for Common Low Resistance Measurement Accuracy Issues

A 4-wire measurement method is the most accurate method to measure small resistances, especially in ranges below 100 ohms. The 4-wire method eliminates measurement errors that long leads and switches introduce in your test setups. The method is also very useful when you need to monitor for accurate and precise temperature changes. This solution brief will compare the differences between making a 2-wire and a 4-wire resistance measurement.

Control Multiple Instruments

Drag-and-drop your way to connect instruments, record results, and visualize measurements across multiple instruments simultaneously, without the need for programming.

Access Integrated Apps

Choose from a wide array of apps with powerful features to simplify your test workflow — from measurement setup and automation to exporting data and analyzing in-depth results — in one software application. The applications support hundreds of Keysight instruments and are continually expanding.

Automate Test Sequences

Rapidly build custom test sequences with an intuitive interface to quickly create tests that previously required days of traditional programming. The integrated Test Flow application makes it simple to drag and drop controls or measurements into a sequence for rapid test development.

Analyze and Export Data

Get easy access to extensive data, screen captures, trace, and measurement logging capabilities. Export your data in multiple formats in just a few clicks.

Instrument Compatibility

- data acquisition units, digital multimeters, and electronic loads
- FieldFox handheld analyzers, function generators, and USB modular products
- universal counters, oscilloscopes, and photovoltaic array simulators
- power analyzers, power meters and power sensors, and power supplies
- signal generators, spectrum analyzers, and network analyzers

Buy One, Get Two Software Promotion

For a limited time, purchase any qualifying A-Series FieldFox Handheld Analyzer and get two of our most popular software options for free. Options include:

- TDR cable measurements
- GPS receiver
- analog demodulation
- EMI measurements

Ranging from 4 to 54 GHz, the industry's most integrated handheld analyzer family just gets more powerful. FieldFox provides the greatest accuracy, superior RF performance, a rugged weather resistance package, and complete software upgradeability. And now, you can acquire more application capabilities at no extra charge.

Expert Technical Support

In addition to your three-year warranty, you will receive three years of KeysightCare Technical Support on all basic instruments in this catalog.

You have 24/7 access to the KeysightCare support portal that contains a prolific knowledge center and self-service web portal. The knowledge center contains thousands of programming examples and detailed technical articles based on decades of R&D and test experience. The self-service web portal enables you to log support requests and get a two-business day committed technical response from our experts.

Mitigate risk and avoid project delays with technical support coverage. Get personalized technical support with KeysightCare Technical Support.

Continue to Lock in Peak Performance with KeysightCare Enhanced

Ensure accurate measurements and priority service to achieve greater peace of mind.

- Extend your peace of mind and eliminate budgetary surprises for up to 5 years with KeysightCare Enhanced, available as an upgrade option in select countries.
- KeysightCare Enhanced provides fast answers for unexpected test challenges with a 2 business hour technical response time.
- KeysightCare Enhanced includes a calibration service of choice based on the equipment's recommended calibration interval with a 5 business day committed turnaround time (excluding shipment and customs processing).
- Keep your project schedules on track and receive priority repair coverage with a 7 business day committed turnaround time (excluding shipment and customs processing).
