Speed Controller with Indicator

Numerical indication of knob rotation for flow rate

reduces flow setting time and setting errors!

Indicator window

8
Numerical indication of knob rotation

Body	size 1	Body size 2 or larger							
Indicator window	Number of needle rotations	Indicator window	Number of needle rotations						
1	1	1	1						
2	2	2	2						
•	•	:							
8	8	10	10						

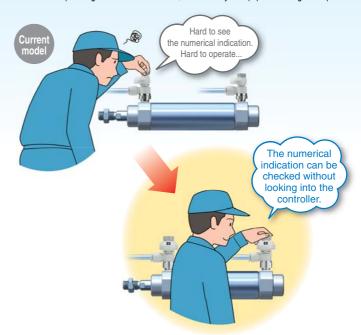

4 indicator window directions offer improved visibility.

Inspection and maintenance labour is reduced by selecting the indicator window direction suitable for the operating conditions. In addition, the flexibility of equipment design is improved.

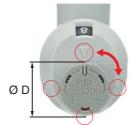

Larger push-lock type knob

Easy to lock

Easy to operate with the larger knob and marking every 90° mark

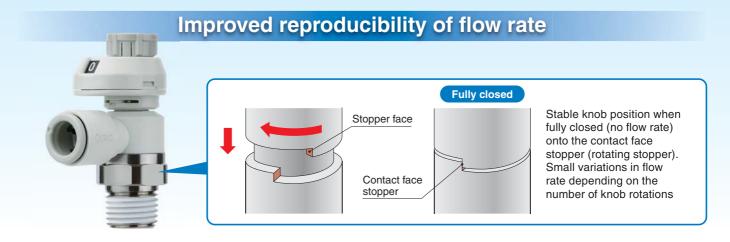

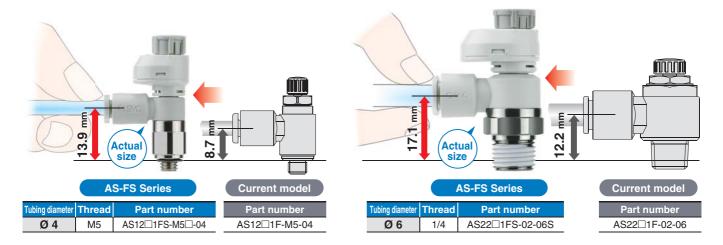

Body size	Ø D [mm]
1	9.4
2	12 (Port size 1/8) 13 (Port size 1/4)
3	16.6
4	18.8

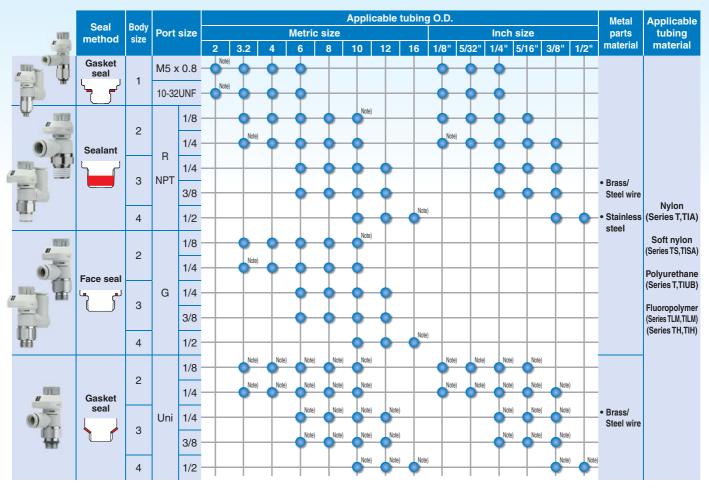

Easier to insert and remove the tube

Easy identification of product type

Series Variations

Note) Universal type is not available.

- Electroless nickel plating type is standardised.
- Stainless steel type is standardised.
- G thread (Face seal) type is standardised.

Symbol	*	*

Specifications

Fluid	Air
Proof pressure	1.5 MPa
Max. operating pressure	1 MPa
Min. operating pressure	0.1 MPa
Ambient and fluid temperature	−5 to 60°C (No freezing)
Applicable tubing material	Nylon, Soft nylon, Polyurethane Note), FEP, PFA

Note) Use caution at the max. operating pressure when using soft nylon or polyurethane tubing. (Refer to the WEB catalogue)

I Be sure to read this before handling. I Refer to the back cover for Safety Instructions. For Flow Control Equipment Precautions, refer to the "Handling Precautions for SMC Products" and "Operation Manual" on the SMC ■ website, http://www.smc.eu

AS-FS Series **Made to Order**

Please contact SMC for detailed dimensions, specifications and delivery.

-X12

Example) AS2201FS-01-04S-X12

Example) AS2201FS-01-04S-X21

Note 1) Not particle-free

Grease-free (Seal: Fluorine-coated) + Restrictor (Without check valve)

Note 2) This product is a restrictor without a check valve (no control direction). Be aware that all part numbers are for a meter-out type; there is no part number for a meterin type.

Note 3) Only the needle and O-ring are fluorine-coated.

Restrictor (Without check valve)

10-

Laser printing

Example) AS2201FS-01-04S-X214

Note) This product is a restrictor without a check valve (no control direction). Be aware that all part numbers are for a meter-out type; there is no part number for a meter-in type.

Example) 10-AS2201FS-01-04S

Note 1) Fluorine grease is used.

Note 2) The particle generation class is 5.

Specifications

Fluid	Air
Proof pressure	1.5 MPa
Max. operating pressure	1 MPa
Min. operating pressure	0.1 MPa
Ambient and fluid temperature	−5 to 60 °C (No freezing)
Applicable tubing material	Nylon, Soft nylon, Polyurethane Note), FEP, PFA

Note) Use caution at the max. operating pressure when using soft nylon or polyurethane tubing. (Refer to the **WEB catalogue**.)

⚠ Caution

Be sure to read this before handling.
Refer to the back cover for Safety Instructions. For Flow Control Equipment Precautions, refer to the "Handling Precautions for SMC Products" and "Operation Manual" on the SMC website, http://www.smc.eu

-X214	Restrictor (Without check valve)
10-	Clean series

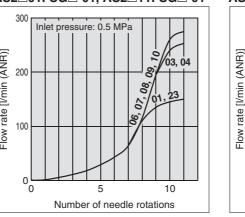

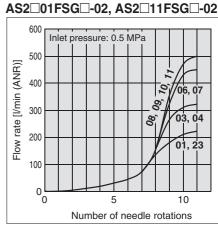

Needle Valve/Flow Rate Characteristics

AS1□01FSG□-M5, AS1□11FSG□-M5 Inlet pressure: 0.5 MPa 100 Flow rate [I/min (ANR)] 9 90 02 8 10

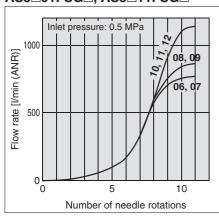

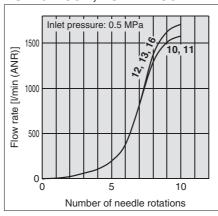

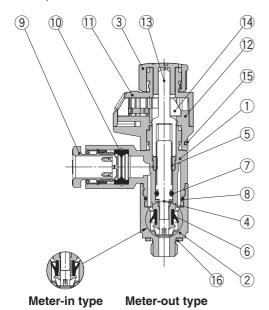

Note) The numbers above the flow rate characteristic curves in the charts show the applicable tubing outside diameter as defined by the product number.

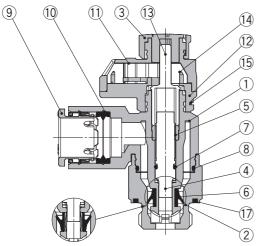

AS-FSG Series

Construction: Elbow Type

Seal method: Gasket seal For M5, 10-32UNF

Seal method: Face seal For G thread

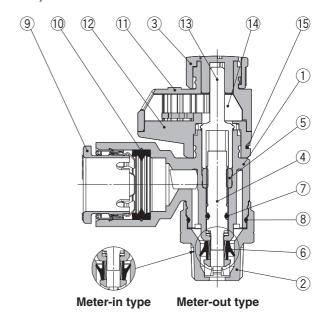

Meter-out type Meter-in type

Component Parts

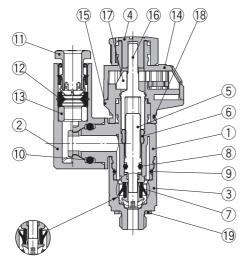

No.	Description	Material	Note
1	Body A	PBT

AS-FSG Series Made to Order

Please contact SMC for detailed dimensions, specifications and delivery.

1 Lubricant: Vaseline

-X12

Example) AS2201FSG-01-04S-X12

2 Grease-free (Seal: Fluorine-coated) + Restrictor (Without check valve)

-X21

Example) AS2201FSG-01-04S-X21

Note 1) Not particle-free

Note 2) This product is a restrictor without a check valve (no control direction). Be aware that all part numbers are for a meter-out type; there is no part number for a meter-in type.

Note 3) Only the needle and O-ring are fluorine-coated.

Restrictor (Without check valve)

-X214

4 Clean Series

10-

Laser printing

Example) AS2201FSG-01-04S-X214

Note) This product is a restrictor without a check valve (no control direction). Be aware that all part numbers are for a meter-out type; there is no part number for a meter-in type.

Example) 10-AS2201FSG-01-04S

Note 1) Fluorine grease is used.

Note 2) The particle generation class is 5.

Speed Controller with Indicator/

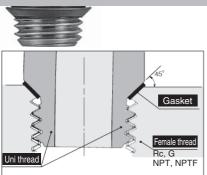

Elbow Type: Uni Thread Type

AS-FS Series

New-stand male threads for piping that reduces the screw-in time by 1/3.

Shape of Uni thread ridge

Use of the chamfered surface of the female thread as the seat surface and adoption of gaskets made by laminating NBR on both surfaces of stainless steel plates achieve secure sealing regardless of the difference of diameters due to the female thread type, deviations due to the tolerance, or the size of the chamfered corner.

(Any standard chamfered female thread can be used.)

A ridge shape has been created as a Uni thread for common applications for Rc, G, NPT and NPTF.

The gasket seal method drastically cuts piping work-hours.

Flow Direction Symbols on Body

		<i>y</i>
	Meter-out	Meter-in
Symbol	*	*

⚠ Caution

I Be sure to read this before handling. I Refer to the back cover for Safety Instructions. For Flow Control Equipment Precautions, refer to the "Handling Precautions for SMC Products" and "Operation Manual" on the SMC ■ website, http://www.smc.eu

Specifications

Fluid	Air
Proof pressure	1.5 MPa
Max. operating pressure	1 MPa
Min. operating pressure	0.1 MPa
Ambient and fluid temperature	−5 to 60°C (No freezing)
Applicable tubing material	Nylon, Soft nylon, Polyurethane Note)

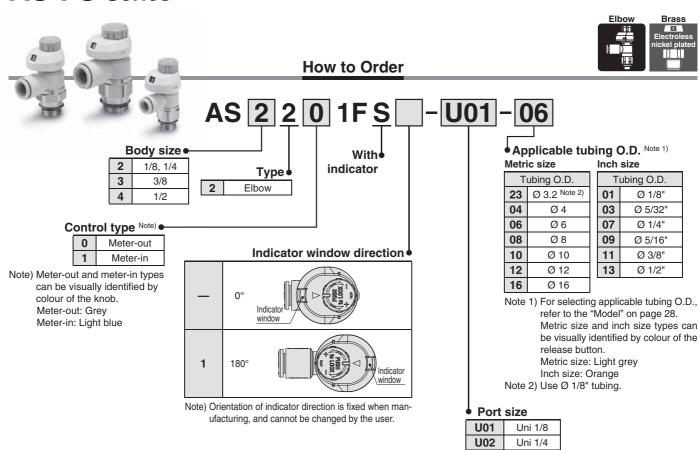

Note) Use caution at the max. operating pressure when using soft nylon or polyurethane tubing. (Refer to the WEB catalogue)

AS-FS Series Specific Product Precautions 1

Be sure to read this before handling. Refer to the back cover for Safety Instructions. For Flow Control Equipment Precautions, refer to the "Handling Precautions for SMC Products" and "Operation Manual" on the SMC website, http://www.smc.eu

Design and Selection

⚠ Warning

1. Check the specifications.

The products in this catalogue are designed to be used in compressed air systems (including vacuum) only.

If the products are used in an environment where pressure or temperature is out of the specified range, damage and/or malfunction may result. Do not use under such conditions. (Refer to the specifications.)

Please contact SMC when using a fluid other than compressed air (including vacuum).

We do not guarantee against any damage if the product is used outside of the specification range.

2. The products in this catalogue are not designed for the use as stop valve with zero air leakage.

A certain amount of leakage is allowed in the product's specifications.

Tightening the needle to reduce leakage to zero may result in equipment damage.

3. Do not disassemble the product or make any modifications, including additional machining.

It may cause human injury and/or an accident.

4. The flow rate characteristics for each product are representative values.

The flow rate characteristics are characteristics of each individual product. Actual values may differ depending on the piping, circuitry, pressure conditions, etc.

5. Sonic conductance (C) and critical pressure ratio (b) values for products are representative values.

The speed controller's controlled flow values are with the needle fully open and free flow with the needle fully closed.

6. Check if PTFE can be used in application.

PTFE powder (Polytetrafluoroethylene resin) is included in the seal material for piping taper thread of male thread type. Confirm that the use of it will not cause any adverse effect on the system.

Please contact SMC if the Safety Data Sheet (SDS) is required.

Mounting

⚠ Warning

1. Operation Manual

Install the products and operate them only after reading the Operation Manual carefully and understanding its contents. Also, keep the Operation Manual where it can be referred to as necessary.

2. Ensure sufficient space for maintenance activities.

When installing the products, allow access for maintenance.

3. Tighten threads with the proper tightening torque. When installing the products, follow the listed proper torque.

Mounting

4. After pushing the knob down to lock, confirm that it is locked.

It should not be possible to rotate the knob to the right or to the left. If the knob is pulled with force, it may break. Do not pull the knob with excessive force.

Locked

Unlocked

5. Check the degree of rotation of the needle valve.

The products in this catalogue are retainer type so that the needle is not removed completely. Over rotation will cause damage.

6. Do not use tools such as pliers to rotate the knob.

It can cause idle rotation of the knob or damage.

7. Verify the air flow direction.

Mounting backward is dangerous, because the speed adjustment needle will not work and the actuator may lurch suddenly.

8. Adjust the speed by opening the needle slowly from the fully closed state.

Loose needle valves may cause unexpected sudden actuator lurching.

When a needle valve is turned clockwise, it is closed and actuator speed decreases. When a needle valve is turned counterclockwise, it is open and actuator speed increases.

9. Do not apply excessive force or shock to the body or fittings with an impact tool.

It can cause damage or air leakage.

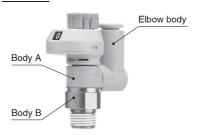

- 10. Refer to the One-touch Fittings catalogue for more details about their piping and mounting precautions.
- 11. To install/remove the product, use an appropriate wrench to tighten/loosen at the supplied nut on body B

Do not apply torque at other points as the product may be damaged. Rotate body A manually for positioning after installation.

12. Do not use body A and/or elbow body for applications involving continuous rotation.

Body A and the fitting section may be damaged.

Universal

AS-FS Series Specific Product Precautions 2

Be sure to read this before handling. Refer to the back cover for Safety Instructions. For Flow Control Equipment Precautions, refer to the "Handling Precautions for SMC Products" and "Operation Manual" on the SMC website, http://www.smc.eu

Mounting

For M5, 10-32UNF

Tightening method

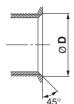

First, tighten it by hand, then give it an additional 1/6 turn to 1/4 turn with a wrench. A reference value for the tightening torque is 1 to 1.5 N·m. Note) Excessive tightening may damage the thread portion or deform the

If the screw is too shallowly screwed in, it may come loose or air may leak.

Chamfered area for female thread

gasket and cause air leakage.

1. Conforming to ISO 16030 (air pressure fluid dynamics – connection – ports and stud ends), the chamfered dimensions shown in the table below are recommended.

Chamfered dimension Ø D (Recommended value)
5.1 to 5.4
5.0 to 5.3

For R, NPT Thread (With sealant)

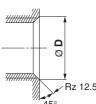

Tightening method

The proper tightening torques of the fittings are as shown in the table below.
 As a guide, tighten it by hand, then turn it two or three turns with a wrench.
 Check the dimensions of each product for the hexagon width across flats.

Connection thread size	Proper tightening torque [N·m]
NPT, R1/8	3 to 5
NPT, R1/4	8 to 12
NPT, R3/8	15 to 20
NPT, R1/2	20 to 25

Chamfered area for female thread

By chamfering as shown in the table below, machining of threads is easier and effective for burr prevention.

(Connection	Chamfered dimension Ø	D (Recommended value)
1	thread size	Rc	NPT, NPTF
Γ	1/8	10.2 to 10.4	10.5 to 10.7
	1/4	13.6 to 13.8	14.1 to 14.3
Γ	3/8	17.1 to 17.3	17.4 to 17.6
	1/2	21.4 to 21.6	21.7 to 21.9

^{*} For Uni thread, Rz 12.5 is necessary for sealing at the chamfered part.

For G Thread (Face seal type)

Tightening method

First, tighten the threaded portion by hand, then use a proper wrench, which could be suitable for the width across flats of the hexagon body, to tighten it further at a wrench tightening angle shown in the table below. For a tightening torque guide, refer to the table below. Check the dimensions of each product for the hexagon width across flats.

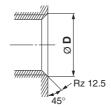

Connection thread size	Wrench tightening angle after hand-tightening [deg]	Proper tightening torque [N·m]
G1/8	10 to 20	3 to 4
G1/4	15 to 35	4 to 5
G3/8	15 to 35	8 to 9
G1/2	15 to 35	14 to 15

⚠ Caution

For G Thread (Face seal type)

Chamfered area for female thread (Recommended value)

1. Conforming to ISO 16030-2001, the chamfered dimensions shown in the table below are recommended. By chamfering as shown in the table below, machining of threads is easier and effective for burr prevention.

Nominal thread	Chamfered di	mension Ø D
size	Min.	Max.
1/8	9.8	10.2
1/4	13.3	13.7
3/8	16.8	17.2
1/2	21.0	21.4

2. Use G external threads with G internal threads.

For Uni Thread

Tightening method

 First, tighten the threaded portion by hand, then use a proper wrench, which could be suitable for the width across flats of the hexagon body, to tighten it further at a wrench tightening angle shown in the table below. For a tightening torque guide, refer to the table below.

Connection Female Thread: Rc, NPT, NPTF

Uni thread size	Wrench tightening angle after hand-tightening [deg]	Tightening torque [N·m]
1/8	30 to 60	3 to 5
1/4	30 to 60	8 to 12
3/8	15 to 45	14 to 16
1/2	15 to 30	20 to 22

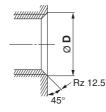

Connection Female Thread: G

Connection i cinale i in caa. G							
Uni thread size	Wrench tightening angle after hand-tightening [deg]	Tightening torque [N·m]					
1/8	30 to 45	3 to 4					
1/4	15 to 30	4 to 5					
3/8	15 to 30	8 to 9					
1/2	15 to 30	14 to 15					

2. The gasket can be reused up to 6 to 10 times.

Chamfered area for female thread

By chamfering as shown in the table below, machining of threads is easier and effective for burr prevention.

Connection	Chamfered dimension Ø D (Recommended value)					
thread size	G	Rc	NPT, NPTF			
1/8	10.2 to 10.6	10.2 to 10.4	10.5 to 10.7			
1/4	13.6 to 14.0	13.6 to 13.8	14.1 to 14.3			
3/8	17.1 to 17.5	17.1 to 17.3	17.4 to 17.6			
1/2	21.4 to 21.8	21.4 to 21.6	21.7 to 21.9			

^{*}For Uni thread, Rz 12.5 is necessary for sealing at the chamfered part.

AS-FS Series Specific Product Precautions 3

Be sure to read this before handling. Refer to the back cover for Safety Instructions. For Flow Control Equipment Precautions, refer to the "Handling Precautions for SMC Products" and "Operation Manual" on the SMC website, http://www.smc.eu

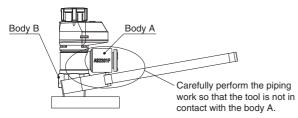

Mounting

A Caution

 This product has a stopper for fully close in rotating direction. Excess torque may break the stopper. Table below shows the maximum allowable torque of the knob.

Body size	Maximum allowable torque [N·m]
M5	0.05
1/8	0.07
1/4	0.16
3/8	0.2
1/2	0.4

When performing the piping work, turn the tightening tool in the horizontal direction to the hexagon across flats of the body B so that any moment is not applied to the body A. If the tool is in contact with the body A, this may cause the body B to come off.

2. Actuator speed needs to be checked each time the setting is changed.

Individual product difference due to tolerance of the components, individual actuator difference, operating conditions and temperature, etc. may cause a large variation in the actuator speed, and for this reason, the final actuator speed needs to be checked every time the setting is changed.

3. Force for lifting the knob is specified as shown in the table below.

Larger lifting force than specified in the table below will cause removal of the knob, flow rate not according to the flow rate characteristics curve, incorrect flow indication with the indicator or damage to the product.

Port size	Knob lifting force
M5 10-32/UNF	1 to 1.5 N
1/8, 1/4, 3/8, 1/2	3.5 to 4 N

4. Do not rotate the product by the indicator part.

Use a wrench for mounting the product.

Otherwise, it may cause damage to the product.

Piping Threads with Sealant

⚠ Caution

- If the fitting is tightened with excessive torque, a large amount of sealant will seep out. Remove the excess sealant.
- 2. Insufficient tightening may loosen the threads, or cause air leakage.
- 3. Reuse
 - 1) Normally, fittings with a sealant can be reused 2 to 3 times.
 - To prevent air leakage through the sealant, remove any loose sealant stuck to the fitting by blowing air over the threaded portion.
 - 3) If the sealant no longer provides effective sealing, wind sealing tape over the sealant before reusing. Do not use the sealant in any form other than a tape type.
- 4. Once the fitting has been tightened, backing it out to its original position often causes the sealant to become defective. Air leakage will occur.
- 5. Use R external threads with Rc internal threads and NPT external threads with NPT internal threads.

Piping

∧ Caution

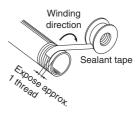

1. Refer to the One-touch Fittings catalogue for more details about their piping and mounting precautions.

2. Preparation before piping

Before piping is connected, it should be thoroughly blown out with air (flushing) or washed to remove chips, cutting oil and other debris from inside the pipe.

3. Winding of sealant tape

When screwing together pipes and fittings, etc., be certain that chips from the pipe threads and sealing material do not get inside the pipe. Also, when the sealant tape is used, leave ap-

⚠ Safety Instructions

These safety instructions are intended to prevent hazardous situations and/or equipment damage. These instructions indicate the level of potential hazard with the labels of "Caution," "Warning" or "Danger." They are all important notes for safety and must be followed in addition to International Standards (ISO/IEC)*1), and other safety regulations.

⚠ Caution:

Caution indicates a hazard with a low level of risk which, if not avoided, could result in minor or moderate

⚠ Warning:

Warning indicates a hazard with a medium level of risk which, if not avoided, could result in death or serious injury.

Danger indicates a hazard with a high level of risk ⚠ Danger: which, if not avoided, will result in death or serious injury. *1) ISO 4414: Pneumatic fluid power - General rules relating to systems. ISO 4413: Hydraulic fluid power – General rules relating to systems. IEC 60204-1: Safety of machinery – Electrical equipment of machines. (Part 1: General requirements)

ISO 10218-1: Manipulating industrial robots - Safety. etc.

⚠ Warning

1. The compatibility of the product is the responsibility of the person who designs the equipment or decides its specifications.

Since the product specified here is used under various operating conditions, its compatibility with specific equipment must be decided by the person who designs the equipment or decides its specifications based on necessary analysis and test results. The expected performance and safety assurance of the equipment will be the responsibility of the person who has determined its compatibility with the product. This person should also continuously review all specifications of the product referring to its latest catalogue information, with a view to giving due consideration to any possibility of equipment failure when configuring the equipment.

2. Only personnel with appropriate training should operate machinery and equipment.

The product specified here may become unsafe if handled incorrectly. The assembly, operation and maintenance of machines or equipment including our products must be performed by an operator who is appropriately trained and experienced

- not service or attempt to remove product and machinery/equipment until safety is confirmed.
 - 1. The inspection and maintenance of machinery/equipment should only be performed after measures to prevent falling or runaway of the driven objects have been
 - 2. When the product is to be removed, confirm that the safety measures as mentioned above are implemented and the power from any appropriate source is cut, and read and understand the specific product precautions of all relevant products carefully
- 3. Before machinery/equipment is restarted, take measures to prevent unexpected operation and malfunction.
- 4. Contact SMC beforehand and take special consideration of safety measures if the product is to be used in any of the following conditions.
 - 1. Conditions and environments outside of the given specifications, or use outdoors or in a place exposed to direct sunlight.
 - 2. Installation on equipment in conjunction with atomic energy, railways, air navigation, space, shipping, vehicles, military, medical treatment, combustion and recreation, or equipment in contact with food and beverages, emergency stop circuits, clutch and brake circuits in press applications, safety equipment or other applications unsuitable for the standard specifications described in the product catalogue.
 - 3. An application which could have negative effects on people, property, or animals requiring special safety analysis.
 - 4. Use in an interlock circuit, which requires the provision of double interlock for possible failure by using a mechanical protective function, and periodical checks to confirm

Limited warranty and Disclaimer/ Compliance Requirements

The product used is subject to the following "Limited warranty and Disclaimer" "Compliance and Requirements". Read and accept them before using the product.

Limited warranty and Disclaimer

- 1. The warranty period of the product is 1 year in service or 1.5 years after the product is delivered, wichever is first.*2) Also, the product may have specified durability, running distance or replacement parts. Please consult your nearest sales branch.
- 2. For any failure or damage reported within the warranty period which is clearly our responsibility, a replacement product or necessary parts will be provided. This limited warranty applies only to our product independently, and not to any other damage incurred due to the failure of the product.
- 3. Prior to using SMC products, please read and understand the warranty terms and disclaimers noted in the specified catalogue for the particular
 - *2) Vacuum pads are excluded from this 1 year A vacuum pad is a consumable part, so it is warranted for a year after it is delivered. Also, even within the warranty period, the wear of a product due to the use of the vacuum pad or failure due to the deterioration of rubber material are not covered by the limited

Compliance Requirements

- 1. The use of SMC products with production equipment for the manufacture of weapons of mass destruction (WMD) or any other weapon is strictly prohibit-
- 2. The exports of SMC products or technology from one country to another are governed by the relevant security laws and regulations of the countries involved in the transaction. Prior to the shipment of a SMC product to another country, assure that all local rules governing that export are known

1. The product is provided for use in manufacturing industries.

The product herein described is basically provided for peaceful use in manufacturing

If considering using the product in other industries, consult SMC beforehand and exchange specifications or a contract if necessary

If anything is unclear, contact your nearest sales branch

∕ Caution

SMC products are not intended for use as instruments for legal metrology.

Measurement instruments that SMC manufactures or sells have not been qualified by type approval tests relevant to the metrology (measurement) laws of each country. Therefore, SMC products cannot be used for business or certification ordained by the metrology (measurement) laws of each country.

↑ Safety Instructions Be sure to read "Handling Precautions for SMC Products" (M-E03-3) before using.
