Derating Curve

For resistors operated at an ambient temperature of 70°C or above, a current rating shall be derated in accordance with the above derating curve.

For resistors operated at a terminal part temperature of described for each size or above, a power rating shall be derated in accordance with the derating curve.

environmental applications

One-Pulse Limiting Electric Power

Please ask us about the resistance characteristic of continuous applied pulse.

Please calculate One-Pulse Limiting Electric Power using upper limit of resistance (50mΩ or 100mΩ) for applied current.

The pulse endurance values are not assured values, so be sure to check the products on actual equipment when you use them.
