

# **STN851**

# Low voltage fast-switching NPN power transistor

## Features

- Very low collector to emitter saturation voltage
- High current gain characteristic
- Fast-switching speed

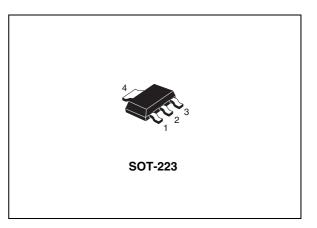

## **Applications**

- Emergency lighting
- Voltage regulators
- Relay drivers
- High efficiency low voltage switching applications

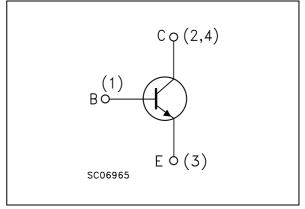

## Description

The device is manufactured in Planar Technology with "Base Island" layout.

The resulting transistor shows exceptional high gain performance coupled with very low saturation voltage.

# 3 Package mechanical data

In order to meet environmental requirements, ST offers these devices in different grades of ECOPACK<sup>®</sup> packages, depending on their level of environmental compliance. ECOPACK<sup>®</sup> specifications, grade definitions and products status are available at: www.st.com. ECOPACK is an ST trademark.
