description

XD4136 are quad general-purpose operational amplifiers, with each amplifier electrically similar to the XD741, except that offset null capability is not provided. The high common-mode input voltage range and the absence of latch-up make these amplifiers ideal for voltage-follower applications. The devices are short-circuit protected and the internal frequency compensation ensures stability without external components.

The XD4136 is characterized for operation from 0°C to 70°C,

absolute maximum ratings over operating free-air temperature range (unless otherwise noted)[†]

Supply voltage (see Note 1): V _{CC+} , XD4136	18 V
V _{CC-} , XD4136	-18 V
Differential input voltage, V _{ID} (see Note 2)	±30 V
Input voltage, V _I (any input) (see Notes 1 and 3)	±15 V
Duration of output short circuit to ground, one amplifier at a time (see Note 4)	Unlimited
Continuous total dissipation	See Dissipation Rating Table
Package thermal impedance, θ_{JA} (see Note 5): N package	80°C/W
Case temperature for 60 seconds: FK package	260°C
Lead temperature 1,6 mm (1/16 inch) from case for 10 seconds: D or N package	260°C
Storage temperature range, T _{stg}	-65°C to 150°C

[†] Stresses beyond those listed under "absolute maximum ratings" may cause permanent damage to the device. These are stress ratings only, and functional operation of the device at these or any other conditions beyond those indicated under "recommended operating conditions" is not implied. Exposure to absolute-maximum-rated conditions for extended periods may affect device reliability.

NOTES: 1. All voltage values, unless otherwise noted, are with respect to the midpoint between V_{CC+} and V_{CC-}.

- 2. Differential voltages are at IN+ with respect to IN-.
- 3. The magnitude of the input voltage must never exceed the magnitude of the supply voltage or 15 V, whichever is less.
- 4. Temperature and/or supply voltages must be limited to ensure that the dissipation rating is not exceeded.
- 5. The package thermal impedance is calculated in accordance with JEDEC 51-7.
