

# Dremel SpeedClic Diamond Cutting Wheel (SC545)

*For limited tough cuts in materials like floor tiles (not metals)*

## What can you do with it?

For smooth, fine cuts in hard materials such as marble, concrete and brick. Designed to be long lasting (completely coated with fine diamond particles) and not lose its shape or break. Diamond disc has breathing holes for reduced heat and less debris during use.

## How to use?

Use with SC402 Mandrel. The Dremel exclusive Easy Speedclic (SC) mechanism, makes wheel changing keyless, easy and fast: PULL - TWIST – RELEASE

Cutting wheels only work on their edge.

We recommend using a (two-handed) golf grip when using this accessory, and using the right angle attachment when a cut is hard to reach. To keep the disc life as long as possible, do not apply excessive pressure and do not exceed the RPM limits.

Cuts 12.7mm (1/2") thick floor tile.

## Materials to use on

Hard materials, such as marble, concrete, brick, porcelain, ceramics, hard epoxy and soft and hard wood. Do not use on metals.

## Recommended speed

15.000-20.000

- Contents: 1 x SpeedClic Diamond Cutting Wheel
