4. Description of the plan:

Change details:

- Regarding FTR-B3/B4 relays, one production line each is going to be transferred from MFCL to FCCZ from BCP point of view.
- Traditional permanent magnet is going to be procured in China local, other piece parts are going to be supplied from MFCL for this transferred production line.
- The unit price of FCCZ made Relays is maybe revised due to cost structure change incurred.
- However, this does not give additional capacity nor commitment to the allocation quantity.
  Your understanding would be highly appreciated.
- As for FCCZ made Relays, specifications/characteristics, and safety standards compliances are same as the one from MFCL made Relays, no change.
